Body, Memory, and Architecture Kent C. Bloomer, Charles Willard Moore, Robert J. Yudell, Buzz Yudell, 1977-01-01 Traces the significance of the human body in architecture from its early place as the divine organizing principle to its present near elimination

The Architecture of the Playing Field Richard L. Cleary, 2025-05-06 A novel exploration of playing fields as aesthetic and architectural spaces that frame athletes creativity and spectators evolving experiences of sport The playing field is more than an arena for sporting rivalry It is a laboratory of invention where athletes and coaches create new uses for the human body in response to the constraints and affordances of space Indeed Richard Cleary argues that from translucent squash courts to the NBA three point line to the city streets used by skateboarders all sports have embedded spatial relationships that are also charged with social significance The Architecture of the Playing Field explores the aesthetic and physical experiences of the grounds on which we compete Cleary digs into the perspectives of spectators athletes coaches and umpires perspectives that have changed along with the shifting configuration and mediation of the field from early live sports coverage to today s TV broadcasts overlaid with high tech graphics and observed from every angle Cleary shows how rules governing the size shape and divisions of the field reflect sports entwinement with societies at large in particular the politics of race and gender Mindful as well that some sports resist containment he analyzes the disruptive use of space by snowboarders and parkour athletes The Architecture of the Playing Field sensitizes us to the interplay of settings and bodies in motion fundamental to the power of sport

The Making of Things Frank Jacobus, Angela Carpenter, Rachel Smith Loerts, Justin M. Tucker, Randal Dickinson, 2021-07-29 The Making of Things is about effect and intention in the schematic architectural model a deep dive into the nature of architectonic form as the underlying syntax for all architectural work By focusing on primitive geometries alongside fundamental principles of architectural thinking and making this book enhances the reader s capacity to intellectually and physically craft models that effectively communicate intention With over 650 diagrams this book acts as an expansive visual glossary that reveals the underlying structure of architectonics and acts as an encyclopedia of formal possibilities Supporting essays in the book explore the nature of perception abstraction and metaphor to provide a theoretical basis of formal effects in architecture This structure enables readers to make clear and direct connections between the things you construct and the reasons you construct them This book is a bridge from the what to the why of form making It is a pedagogical notebook a design primer that prompts discourse about the nature of objects This is a must have desk reference for beginning architecture and interior design students to stimulate their creative approaches and gain foundational knowledge of the underlying effects of formal typologies and how they manifest themselves in built forms around the world

Monographic Series Library of Congress, 1978 Creating Sensory Spaces Barbara Erwine, 2016-12-19 Creating Sensory Spaces celebrates spaces enlivened with sensual richness and provides you with the

knowledge and tools necessary to create them Drawing on numerous built case studies in ten countries and illustrated with over 85 full color images the book presents a new framework for the design of sensory spaces including light color temperature smell sound and touch Bridging across disciplines of architecture engineering phenomenology and perceptual psychology this book informs the design of buildings and neighborhoods that reclaim the role of the body and all the senses in creating memorable experiences of place and belonging Body, memory and architecture K.C.
