Brain Aging Models Methods And Mechanisms Frontiers In Neuroscience:

Brain Aging David R. Riddle, 2007-04-19 Recognition that aging is not the accumulation of disease but rather comprises fundamental biological processes that are amenable to experimental study is the basis for the recent growth of experimental biogerontology As increasingly sophisticated studies provide greater understanding of what occurs in the aging brain and how these changes occur **Methods and applications in aging neuroscience** Yang Jiang, Wai Haung Yu, S. Abid Hussaini, 2023-07-10 **Redox-Active Therapeutics** Ines Batinić-Haberle, Júlio S. Rebouças, Ivan Spasojević, 2016-10-13

This essential volume comprehensively discusses redox active therapeutics focusing particularly on their molecular design mechanistic pharmacological and medicinal aspects The first section of the book describes the basic aspects of the chemistry and biology of redox active drugs and includes a brief overview of the redox based pathways involved in cancer and the medical aspects of redox active drugs assuming little in the way of prior knowledge Subsequent sections and chapters describe more specialized aspects of central nervous system injuries neurodegenerative diseases pain radiation injury and radioprotection such as of brain lungs head and neck and erectile function and neglected diseases e g leishmaniasis It encompasses several major classes of redox active experimental therapeutics which include porphyrins salens nitrones and most notably metal containing e g Mn Fe Cu Zn Sb drugs as either single compounds or formulations with nanomaterials and quantum dots Numerous illustrations tables and figures enhance and complement the text extensive references to relevant literature are also included Redox Active Therapeutics is an invaluable addition to Springer's Oxidative Stress in Applied Basic Research and Clinical Practice series It is essential reading for researchers clinicians and graduate students interested in understanding and exploring the Redoxome the organism redox network as an emerging frontier in drug design redox biology and medicine **Geriatric Trauma and Critical Care** Fred A. Luchette, Jay A. Yelon, 2017-07-30 With the expertise of an author panel of leading clinicians in the field of surgery trauma critical care and geriatrics the new edition of this text addresses the explosion in knowledge on the impact aging has on injury acute illness and critical care management The text covers the physiologic changes associated with aging as well as the clinical assessment stratification and management of acute illness and injury Furthermore the new edition discusses the full spectrum of critical care management of the elderly Part I explores the impact of aging on health and the healthcare system There will be detailed discussion on the physiologic effects of aging and the impact on clinical management The management of common surgical emergencies in the elderly is addressed in Part II Part III addresses the evaluation and management of trauma and injury Finally Part IV explores the specific challenges of critical care management including end of life and ethics in the geriatric population Updated information reflective of the expansive literature is addressed in all sections New to the second edition are chapters on prehospital care burns nursing concerns and abdominal solid organ injury Appropriate chapters will include case vignettes and clinical algorithms All chapters include a bullet point summary Geriatric Trauma and Critical Care 2nd Edition will be of

great value to trauma surgeons acute care surgeons critical care specialists emergency medicine physicians geriatricians general surgeons and trainees in surgery critical care and emergency medicine Advanced practice nurses critical care nurses and physician assistants will also find this a useful and practical resource *The Very Old Critically Ill Patients* Hans Flaatten,Bertrand Guidet,Hélène Vallet,2022-08-03 This book part of the European Society of Intensive Care Medicine ESICM textbook series provides detailed up to date information on the care of the critical ill very old 80 years patients in the ICU The very old are expanding fast in our populations and this is mirrored in our hospitals and ICUs as well During the last decade a lot more information about the group of critical ill elderly has been published and several large networks cooperate in performing multinational studies in this field one of them with roots in the ESICM This book will give readers knowledge about the current epidemiology of elderly ICU patients in patients centered outcomes and factors affecting these outcomes A large part is devoted to age related changes in vital organ functions and the specific geriatric syndromes like frailty cognitive decline reduced activity of daily living sarcopenia and immunosenescence This is all important for the practicing intensivists to know about In addition specific groups of the elderly in the ICU are also described like the elderly patients with trauma or sepsis The book is written jointly by intensivists and geriatricians often working in teams and originating from many different countries This herald a new era in the collaboration between these two groups in order to improve care and rehabilitation We have a lot to learn from each other as both groups have a holistic view of our patients although with different perspectives This book should be of value for all working in adult ICUs physicians as well as nurses It will hopefully lead to a better understanding of the particular challenges posed by this important sub group of ICU patients and how to manage his group in a way that combine respect for life as well as death and includes patients and caregivers in this process
