Age Of Context Mobile Sensors Data And The Future Of Privacy:

Age of Context Robert Scoble, Shel Israel, 2014 In 2006 co authors Robert Scoble and Shel Israel wrote *Naked Conversations* a book that persuaded businesses to embrace what we now call social media Six years later they have teamed up again to report that social media is but one of five converging forces that promise to change virtually every aspect of our lives You know these other forces already mobile data sensors and location based technology Combined with social media they form a new generation of personalized technology that knows us better than our closest friends Armed with that knowledge our personal devices can anticipate what we ll need next and serve us better than a butler or an executive assistant The resulting convergent superforce is so powerful that it is ushering in a era the authors call the Age of Context In this new era our devices know when to wake us up early because it snowed last night they contact the people we are supposed to meet with to warn them we re running late They even find content worth watching on television They also promise to cure cancer and make it harder for terrorists to do their damage Astoundingly in the coming age you may only receive ads you want to see Scoble and Israel have spent more than a year researching this book They report what they have learned from interviewing more than a hundred pioneers of the new technology and by examining hundreds of contextual products What does it all mean How will it change society in the future The authors are unabashed tech enthusiasts but as they write an elephant sits in the living room of our book and it is called privacy We are entering a time when our technology serves us best because it watches us collecting data on what we do who we speak with what we look at There is no doubt about it Big Data is watching you The time to lament the loss of privacy is over The authors argue that the time is right to demand options that enable people to reclaim some portions of that privacy Age of Context Robert Scoble, Shel

Israel, 2013-09-23 **Digital Data Collection and Information Privacy Law** Mark Burdon, 2020-04-23 In *Digital Data Collection and Information Privacy Law* Mark Burdon argues for the reformulation of information privacy law to regulate new power consequences of ubiquitous data collection Examining developing business models based on collections of sensor data with a focus on the smart home Burdon demonstrates the challenges that are arising for information privacy s control model and its application of principled protections of personal information exchange By reformulating information privacy s primary role of individual control as an interrupter of modulated power Burdon provides a foundation for future law reform and calls for stronger information privacy law protections This book should be read by anyone interested in the role of privacy in a world of ubiquitous and pervasive data collection *Privacy: A Very Short Introduction* Raymond Wacks, 2015-03-26 Some would argue that scarcely a day passes without a new assault on our privacy In the wake of the whistle blower Edward Snowden s revelations about the extent of surveillance conducted by the security services in the United States Britain and elsewhere concerns about individual privacy have significantly increased The Internet generates risks unimagined even twenty years ago to the security and integrity of information in all its forms The manner in which information is collected

stored exchanged and used has changed forever and with it the character of the threats to individual privacy The scale of accessible private data generated by the phenomenal growth of blogs social media and other contrivances of our information age pose disturbing threats to our privacy And the hunger for gossip continues to fuel sensationalist media that frequently degrade the notion of a private domain to which we reasonably lay claim In the new edition of this Very Short Introduction Raymond Wacks looks at all aspects of privacy to include numerous recent changes and considers how this fundamental value might be reconciled with competing interests such as security and freedom of expression

ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Tech Olivier Alexandre, 2025-09-23 The first holistic analysis of the space mindset and inner workings of Silicon Valley in a generation Sometimes only an outsider can show how an industry works and how that industry works upon the world In *Tech* sociologist Olivier Alexandre takes us on a revealing tour of Silicon Valley s prominent personalities and vibrant networks to capture the way its denizens live think relate and innovate and how they shape the very code and conduct of business itself Even seasoned observers will gain insight into the industry s singular milieu from Alexandre s piercing eye He spends as much time with Silicon Valley s major players as with those who fight daily to survive within a system engineered for disruption Embedded deep within the community Alexandre accesses rooms shut tight to the public and reports back on the motivations ambitions and radical vision guiding tech companies From the conquest of space to quantum computing engineers have recast the infinitely large and small Some scientists predict the end of death and the replacement of human beings with machines But at what cost Alexandre sees a shadow hanging over the Valley jeopardizing its future and the economy made in its image Critical yet fair *Tech* illuminates anew a world of
