Emerging Technologies on Computer Science and Operations Research Stephen G. Nash, Ariela Sofer, 2012-12-06 The emergence of high performance computers and sophisticated software technology has led to significant advances in the development and application of operations research. In turn, the growing complexity of operations research models has posed an increasing challenge to computational methodology and computer technology. This volume focuses on recent advances in the fields of Computer Science and Operations Research on the impact of technological innovation on these disciplines and on the close interaction between them. The papers cover many relevant topics: computational probability design and analysis of algorithms, graphics, heuristic search and learning, knowledge based systems, large scale optimization, logic modeling and computation, modeling languages, parallel computation, simulation and telecommunications. 1 This volume developed out of a conference held in Williamsburg, Virginia, January 5-7, 1994. It was sponsored by the Computer Science Technical Section of the Operations Research Society of America. The conference was attended by over 120 people from across the United States and from many other countries. We would like to take this opportunity to thank the participants of the conference, the authors, the anonymous referees and the publisher for helping produce this volume. We express our special thanks to Bill Stewart and Ed Wasil for serving as Area Editors. **Monographic Series** Library of Congress, 1976
