

Heart

Layer 1

The heart is a muscular organ consisting of the pericardium, myocardium, endocardium and endocardium layers and 4 chambers.

The heart is divided into two parts: the right and left sides. The right side is responsible for pumping blood to the lungs, while the left side is responsible for pumping blood to the rest of the body. The heart is also divided into four chambers: the right atrium, right ventricle, left atrium, and left ventricle.

The right and left ventricles are connected by the interventricular septum, while the right and left atria are connected by the interatrial septum. The heart is also connected to the pulmonary arteries and pulmonary veins, which are responsible for carrying blood to and from the lungs.
