Feinberg, 2010-11-04 Aldous Huxley's 1932 book Brave New World foresees a world in which technological advances have obliterated morality and freedom John Feinberg and Paul Feinberg in the first edition of Ethics for a Brave New World noted how Huxley landed frighteningly close to the truth Their book responded to ethical crises such as abortion euthanasia capital punishment and genetic engineering by looking to Scripture for principles to guide us through the moral quagmires of our time Now dramatically updated and expanded this edition of Ethics for a Brave New World seeks to maintain the relevance rigorous scholarship and biblical faithfulness of the first edition While many of the topics covered in the book remain the same John Feinberg has revised each chapter to keep it current with contemporary trends and to respond to the most recent scholarship There is a new chapter on stem cell research and greatly expanded material on issues such as homosexuality and genetic engineering This important resource will be a valuable guide for students and those seeking answers to ethical dilemmas

The Brave New World of eHRM 2.0 James H. Dulebohn, Dianna L. Stone, 2018-02-01 Information technology has had a profound effect on almost every aspect of our lives including the way we purchase products communicate with others receive health care services and deliver education and training It has also had a major impact on human resource management HR processes and it has transformed the way that we recruit select motivate and retain employees Gueutal Kavanagh Thite Johnson 2015 For example some estimates indicated that 100 % of large organizations now use web based recruiting Sierra Cedar 2016 2017 and over half of the training conducted in America is delivered using technology based methods American Society for Training and Development 2015 Results of a survey by the Society for

Human Resource Management SHRM 2002 revealed that technology is one of the major drivers of change in today's HR departments. In spite of the increased use of technology in the field of HR, relatively little research has examined the acceptance and effectiveness of electronic human resource management (eHRM) methods. As a consequence, practitioners are implementing these new systems without the benefit of research. Thus, the primary purpose of this issue is to review the results of research on a number of important eHRM practices including e-recruitment, e-selection, gamification, e-socialization, e-learning, and e-performance management. It also considers how technology can be used to manage task-based contingent workers and examines the problems associated with cyberdeviance in organizations. The chapters in this series should be extremely beneficial for HR researchers and practitioners who are employing these new systems.

Brave New World? Celia Deane-Drummond, 2003-11-01

One of the key issues facing us in the next millennium is the ability to manipulate the genetics of living organisms. The possibility of manipulating human genetics raises many theological, ethical, and socio-political issues. These include specific decisions about whether the technology will be developed, how it will be applied, and more general questions about the technical manipulation of natural processes. From a theological perspective, the human genome project not only challenges particular doctrines such as that of creation, eschatology, and anthropology, but also raises particular issues of social justice and medical ethics. The purpose of this book is to bring together the collective expertise of theologians, scientists, and social scientists in order to provide a forum for critique and public debate focused on the human genome project. It is hoped that the results presented in this book offer a sophisticated theological and ethical response.
