In *Training for Catastrophe* author Lindsay Thomas shows how our security regime reimagines plausibility to focus on unlikely and even unreal events rather than probable ones. With an in-depth focus on preparedness, a pivotal emergent national security paradigm since 9/11, she explores how fiction shapes national security. Thomas finds fiction at work in unexpected settings from policy documents and workplace training manuals to comics and video games. Through these texts as well as plenty of science fiction, she examines the philosophy of preparedness, interrogating the roots of why it asks us to treat explicitly fictional events as real. Thomas connects this philosophical underpinning to how preparedness plays out in contemporary politics, emphasizing how it uses aesthetic elements like realism, genre, character, and plot to train people both to regard some disasters as normal and to ignore others. *Training for Catastrophe* makes an important case for how these documents elicit consent and compliance. Thomas draws from a huge archive of texts, including a Centers for Disease Control comic about a zombie apocalypse, the work of Audre Lorde, and the political thrillers of former national security advisor Richard Clarke, to ask difficult questions about the uses and values of fiction. A major statement on how national security intrudes into questions of art and life, *Training for Catastrophe* is a timely intervention into how we confront disasters.

The contributors are either specialists in their fields or have exceptional hands-on experience with FTD sufferers. Beginning with a focus on the medical facts, the first part defines and explores FTD as an illness distinct from Alzheimer's disease. Also considered are clinical and medical care issues and practices, as well as such topics as finding a medical team, palliative approaches to managing care, and rehabilitation interventions. The next section on managing care examines the daily care routine, including exercise, socialization, adapting the home environment, and behavioral issues, along with end-of-life concerns. In the following section on caregiver resources, the contributors identify professional and government assistance programs, along with private and community resources and legal options. The final section focuses on the caregiver in particular, the need for respite, holistic health practices, and the challenge of managing emotions. This new
