Betteratschool A Platform For Student Centered Mobile Learning:

BetterAt/School Marilee Bowles-Carey,2013-09-19 BetterAt School A Platform for Student Centered Mobile Learning is a report of the outcomes of a research project funded by the Bill Melinda Gates Foundation The goal of the project was to explore ways that interest based learning software might bridge the gap between the Common Core Standards and the lack of motivation frequently found in low income students The BetterAt School project built upon research begun in 2005 at IIT Institute of Design ID funded by the John D and Catherine T MacArthur Foundation This work centered on identifying ways that digital media could be beneficial to interest based learning One of the initiatives that emerged from that was the Electronic Learning Record which quickly developed into BetterAt A core assumption of this work was that learning is enhanced when it relates to a student s goals and interests For kids from home environments where they see a variety of jobs and people with choices about their future the standard school experience can be supportive For kids without these examples and choices digital media can help by letting them start with their existing interests to expand their view of possible options The initial challenge for the project was to find ways to relate intrinsic interests to the Common Core with the ultimate goal of helping students prepare for college and productive careers We thank the Bill Melinda Gates Foundation and the John D and Catherine T MacArthur Foundation for their support of research at Institute of Design

Sustaining Mobile Learning Wan Ng,Therese M. Cumming,2015-07-16 Mobile technologies are one of the fastest growing areas of technology in education For learners they offer an appealing opportunity to transcend teacher defined knowledge and approaches by being able to access multiple alternative sources of information anytime and anywhere While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade there is no consolidated view of how to sustain the practices or opportunities that are being explored Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies time and training to initiate mobile learning programs The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies where with every change new possibilities are opened up and investments required In addition educators are still attempting to reconcile institutions of formal education with informal mobile learning The book addresses these issues

with a particular focus on exploring the challenges surrounding the sustainability of mobile learning in K 12 and higher education investigating the importance of sustaining mobile learning for diverse populations of students globally discussing theoretical models for the sustainability of mobile learning providing the reader with strategies for sustaining mobile learning Presenting new research alongside theoretical models and ideas for practice the book will appeal to researchers academics and postgraduate students in the fields of education and mobile learning as well as those working in teacher education

The New Landscape of Mobile Learning Charles Miller, Aaron Doering, 2014-02-24

The New Landscape of Mobile Learning is the first book to provide a research based overview of the largely untapped array of potential tools that mobile Learning offers educators and students in face to face hybrid and distance education This cutting edge guide provides An essential explanation of the emergence and role of Apps in education Design guidelines for educational Apps Case studies and student narratives from across the US describing successful App integration into both K 12 and Higher Education Robust research based evaluation criteria for educational Apps Although many believe that Apps have the potential to create opportunities for transformative mobile education a disparity currently exists between the individuals responsible for creating Apps i e developers who often have little to no instructional experience and the ultimate consumers in the classroom i e K 20 educators and students The New Landscape of Mobile Learning bridges this gap by illuminating critical design integration and evaluation narratives from leaders in the instructional design distance education and mobile learning fields
