

352AAV 4-Way Multipoise Two-Stage Condensing Gas Furnace

Sizes 060 thru 120

Product Data

AC0085

Utilizing the extensive resources available to Bryant, a new standard of excellence has been achieved with the model 352AAV Plus 90t™ 4-Way Multipoise Furnace.

The model 352AAV is a unique 4-way multipoise condensing furnace with features like no other product in its class. The 352AAV builds on the many Bryant successes in the furnace industry and establishes a new standard for all high-efficiency gas furnaces.

FEATURES

Perfect Heat™ — The Plus 90t™ combines two heating stages to vary the amount of gas being used from low-heat to high-heat stage. The low-stage operation allows longer running periods, which helps maintain your most comfortable temperature, prevents drafts, reduces noise, and enhances the air quality of your home. During extreme cold, the high-heat stage will run to ensure that you are still comfortable.

Primary Heat Exchanger & Secondary Heat Exchanger — The primary heat exchanger is corrosion resistant and maintains a proven track record for long-term reliability and high-efficiency performance. The secondary heat exchanger is built with a patented lamination process that bonds a corrosion-proof lining of polypropylene to a heavy, galvanized steel shell. The unique secondary clamshell design allows wider spacing between cells for reduced air resistance through the furnace, reduced load on the blower motor, and reduced need for cleaning.

Perfect Light™ Igniter — Bryant's unique SN igniter is not only physically robust but it is also electrically robust. It is capable of

running at line voltage and does not require complex voltage regulation as do other brands. This unique feature further enhances the reliability of Bryant's 352AAV gas furnace and continues Bryant's tradition of providing a reliable and durable product.

Fan On Plus™ — Improves comfort all year long by allowing you to select the continuous fan speed right at the thermostat.

SmartEvap™ — Allows your system to reduce summertime humidity levels by nearly 10% over standard systems.

Media Filter Cabinet — Enhanced indoor air quality in your home is made easier with our media filter cabinet—a standard accessory on all furnaces. When installed as a part of your system, this cabinet allows for an easy and convenient addition of a Bryant high-efficiency air filter.

Adaptive Logic Control Board — This self-adjusting control board contains a microprocessor which automatically calculates the precise amount of time your furnace should run and at what speed it should run to obtain the best comfort and energy efficiency. This control board also includes an extensive troubleshooting and component test sequence that can monitor your heating system to ensure that it is operating properly.

4-Way Multipoise Design — Allows the model 352AAV to be installed in an upflow, downflow, or horizontal orientation. Factory configured for upflow applications with only simple drain connection changes required for conversion to downflow or horizontal.

Direct or Non-Direct Venting — The 352AAV can be installed as a Non-Direct 1-pipe vent or Direct 2-pipe vent furnace. This provides added flexibility to meet diverse installation needs.

Full Cabinet Insulation — This insulation completely surrounds the internal furnace casing allowing for reduced and dampened sounds and maintained efficiencies.

Two-Speed Inducer Motor — This motor works with the inducer fan to optimize combustion efficiency and exhaust the flue gases out of the house. The motor has two speeds and an incorporated fan to keep the motor cool while reducing sound.

Permanent Split Capacitor (PSC) Blower Motor — The 352AAV has a PSC blower motor that has several pre-selected fixed speeds which can be customized to duct work installation requirements. The motor has a wide application of use, a basic control scheme, and is extremely reliable.

— The

Soft Motor Mounts — These motor mounts help to absorb shock, decrease the vibration of the motor, and minimize noise.

Two Stage Gas Valve — The 352AAV has a 2-stage gas valve to vary the amount of gas being used from low-heat to high-heat stage. The low-stage operation allows longer running periods, which helps maintain your most comfortable temperature, prevents drafts, reduces noise, and enhances the air quality of your home. During the extreme cold, the high-heat levels will run to ensure that you are still comfortable.

Bryant 320aaz Manual

James Lock, Daniel Le Grange

Bryant 320aaz Manual:

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1964 Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June
