Introductory Astronomy Laboratory Manual Donald J. Summers, 1997 Astronomy Activity and Laboratory Manual Hirshfeld, 2008-08-29 Hirshfeld's Astronomy Activity and Laboratory Manual is a collection of twenty classroom based exercises that provide an active learning approach to mastering and comprehending key elements of astronomy. Used as a stand alone activity book or as a supplement to any mainstream astronomy text, this manual provides a broad historical approach to the field through a narrative conveying how astronomers gradually assembled their comprehensive picture of the cosmos over time. Each activity has been carefully designed to be implemented in classrooms of any size and require no specialized equipment beyond a pencil, straightedge and calculator. The necessary mathematical background is introduced on an as needed basis for every activity and is accessible for most undergraduate students.
