Future is Urban: Livability, Resilience & Resource Conservation Utpal Sharma,R. Parthasarathy,Dr Aparna,2023-05-26 Cities have played an important role in our lives since the dawn of civilization However cities are slowly becoming overwhelmed and therefore intervention is desirable towards green blue and egalitarian nature Even with current urban issues we must rise to the occasion as professionals to create cities that are social cities that take care of the environment and cities that are digital Increased citizen participation is indispensable in this process The International Conference on Future is Urban IFCU 21 Dec 16 18 2021 Ahmedabad India takes into account Livability Resilience Resource Conservation for planning Future and cities in future

[Interactive Approaches to Water Governance in](#)

Asia Kenji Otsuka, 2019-01-12 This book applies interactive perspectives which have historically mainly been discussed in the context of Western European countries to case studies on water governance in Asia. It examines how these perspectives can be used to reveal complex and dynamic interactions in water governance in Asia and how interactions between policies and practices as well as those between formal institutes and emerging informal institutes come to pass. In two introductory chapters and seven case studies in Asia (two from China and each one from Japan, Thailand, the Philippines, Indonesia, and India), the book reveals the interactive forms currently emerging in Asia under hierarchical but often fragmented administrative systems. In addition, it explores emerging hybrid forms of interactive governance which bring together governmental and non-governmental actors and discusses how the expected role of government and roles of non-governmental actors could be changed to solve problems in a more cooperative manner. In this context, researchers from outside the locality could play an important role helping facilitate such forms of interactive governance. The book offers extensive information on the essential features of interactive forms and on the role of such transdisciplinary approaches, making it a valuable resource not only for scholars and university students but also for policymakers and grass roots practitioners directly involved in the interactive process of water governance.
