Development, assessment, improvement, and standardization of methods in herbal drug research Gunawan Indrayanto,Kornkanok Ingkaninan,Abdul Rohman,2022-12-08 Chemometrics and Authenticity of Foods of Plant Origin Sofia Agriopoulou,Maria Tarapoulouzi,Theodoros Varzakas,2022-12-22 One of the challenges facing the world is feeding the ever increasing population with food security being a growing 21st century problem This stresses the need for coordinated international systems to prevent and mitigate food fraud in global food supply chains Food fraud which is usually financially motivated has significant consequences including unfair competition major damage to markets and organizations loss of consumer confidence and it raises food safety issues A shift toward a more plant based diet can be endorsed to promote sustainability but also to improve public health and minimize animal suffering The aim of this book is to deal with issues related to authenticity and chemometrics of the most important food products of plant origin such as cereals nuts legumes table olives and olive oil coffee tea fruits and vegetables fruit juices spices mushrooms beers and wines and honey using state of the art analytical techniques and instrumentation coupled with available chemometric tools **Handbook of Chemical and Biological Plant Analytical Methods** Shilin Chen,Andrew Marston,Hermann Stuppner,2014-07-15 Plants and plant derived compounds and drugs are becoming more and more popular with increasing numbers of scientists researching plant analysis The quality control of herbal drugs is also becoming essential to avoid severe health problems and in the future many more new drugs will be developed from plant sources This three volume Handbook featuring 47 detailed review articles is unique as it deals with chemical and biological methodologies for plant analysis It presents the most important and most accurate methods which are available for plant analysis This comprehensive work is divided into six sections as follows Sample preparation and identification discussing plant selection and collection followed by extraction and sample

preparation methodologies Extraction and sample preparation methodologies Instrumentation for chemical analysis several instrumentations for chemical plant analysis are presented with an emphasis on hyphenated techniques e g the coupling between HPLC and mass spectrometry and HPLC with NMR Strategies for selective classes of compounds coverage of the most interesting classes of compounds such as polysaccharides saponins cardiotonic glycosides alkaloids terpenoids lipids volatile compounds and polyphenols flavonoids xanthenes coumarins naphthoquinones anthraquinones proanthocyanidins etc Biological Analysis includes phenotyping DNA barcoding techniques transcriptome analysis microarray metabolomics and proteomics Drugs from Plants covers the screening of plant extracts and strategies for the quick discovery of novel bioactive natural products Safety assessment of herbal drugs is highly dependent on outstanding chromatographic and spectroscopic methods which are also featured here This Handbook introduces to scientists involved in plant studies the current knowledge of methodologies in various fields of chemically and biochemically related topics in plant research The content from this Handbook will publish online within the Encyclopedia of Analytical Chemistry via Wiley Online Library <http://www.wileyonlinelibrary.com/ref/eac> Benefit from the introductory offer valid until 30 November 2014 Introductory price 425 00 695 00 550 00 List price thereafter 495 00 795 00 640 00 Fingerprinting Techniques in Food Authentication and Traceability K. S. Siddiqi, Leo M.L. Nollet, 2018-10-08 There is an increasing interest by consumers for high quality food products with a clear geographical origin With these products in demand suitable analytical techniques are needed for the quality control Current analytical approaches are mass spectrometry techniques spectroscopic techniques separation techniques and others Fingerprinting Techniques in Food Authentication and Traceability discusses the principles of the techniques together with their advantages and drawbacks and reported applications concerning geographical authenticity A combination of methods analyzing different types of food compounds seems to be the most promising approach to establish the geographical origin The abundant acquired data are analyzed by chemometrics Producing safe and high quality food is a prerequisite to ensure consumer health and successful domestic and international trade and is critical to the sustainable development of national agricultural resources Systems to trace food or feed products through specified stages of production processing and distribution play a key role in assuring food safety Analytical techniques that enable the provenance of food to be determined provide an independent means of verifying traceability systems and also help to prove product authenticity to combat fraudulent practices and to control adulteration which are important issues for economic religious or cultural reasons Proof of provenance has become an important topic in the context of food safety food quality and consumer protection in accordance with national legislation and international standards and guidelines **Emerging Food Authentication Methodologies Using GC/MS** Kristian Pastor, 2023-07-27 This edited book provides an overview of existing and emerging gas chromatography mass spectrometry GC MS based methods for the authentication and fraud detection in all major food groups and beverages Split in four parts the book opens with a comprehensive introduction into the GC MS technique and a

summary of relevant statistical and mathematical models for data analysis The main parts focus on the authentication of the main food groups cereals dairy products fruit meat etc and beverages e g coffee tea wine and beer The chapters in these sections follow a distinct structure describing the nutritional value of the product common fraud practices economic implications and relevant biomarkers for the authentication process such as volatile compounds fatty acids amino acids isotope ratios etc The final chapter provides an outlook on where the methodologies and the applications may be heading for Food fraud is serious problem that affects food industries of all kinds which is why food authentication plays an increasingly important role This book aims to serve as a knowledge base for all researchers in academia regulatory laboratories and industry employing GC MS for food analysis Due to its comprehensive introduction and consistent structure it can also serve as an excellent resource for students in food science food technology food chemistry and nutrition
