Btec First Certificate Applied Science Bk 1:

BTEC First Engineering Michael H. Tooley, Mike Tooley, 2010 This course book covers the compulsory core units of the 2010 BTEC First Engineering schemes from Edexcel It gives full coverage of the common core units for the certificate diploma units one and two plus the additional compulsory units for diploma students units three and four for all pathways

Science for Engineering J. O. Bird, 2003 Engineering science is introduced through examples rather than theory in this book enabling students to develop a sound understanding of engineering systems in terms of the basic scientific laws and principles

BTEC First in Applied Science: Principles of Applied Science Student Book David Goodfellow, Ismail Musa, Sue Hocking, 2012-07 This student book supports the level 1 level 2 BTEC First Award in Applied Science Principles of Applied Science NQF specification for first teaching from September 2012 The book covers all four mandatory units so learners have relevant and specific content to complete the new 2012 award

Basic Engineering Mathematics John Bird, 2005-03-05 Unlike most engineering maths texts this book does not assume a firm grasp of GCSE maths and unlike low level general maths texts the content is tailored specifically for the needs of engineers The result is a unique book written for engineering students which takes a starting point below GCSE level Basic Engineering Mathematics is therefore ideal for students of a wide range of abilities and especially for those who find the theoretical side of mathematics difficult All students taking vocational engineering courses who require fundamental knowledge of mathematics for engineering and do not have prior knowledge beyond basic school mathematics will find this book essential reading The content has been designed primarily to meet the needs of students studying Level 2 courses including GCSE Engineering and Intermediate GNVQ and is matched to BTEC First specifications However Level 3 students will also find this text to be a useful resource for getting to grips with the essential mathematics concepts needed for their study as the compulsory topics required in BTEC National and AVCE A Level courses are also addressed The fourth edition incorporates new material on adding waveforms graphs with logarithmic scales and inequalities key topics needed for GCSE and Level 2 study John Bird's approach is based on numerous worked examples supported by 600 worked problems followed by 1050 further problems within exercises included throughout the text In addition 15 Assignments are included at regular intervals Ideal for use as tests or homework full solutions to the Assignments are supplied in the accompanying Instructor's Manual available as a free download for lecturers from <http://textbooks.elsevier.com>

Science for Engineering John Bird, 2013-01-17 Science for Engineering offers an introductory textbook for students of engineering science and assumes no prior background in engineering John Bird focuses upon examples rather than theory enabling students to develop a sound understanding of engineering systems in terms of the basic laws and principles This book includes over 580 worked examples 1300 further problems 425 multiple choice questions with answers and contains sections covering the mathematics that students will require within their engineering studies mechanical applications electrical applications and engineering systems This new edition of Science for Engineering covers the

fundamental scientific knowledge that all trainee engineers must acquire in order to pass their exams It has also been brought fully in line with the compulsory science and mathematics units in the new engineering course specifications Supported by free lecturer materials that can be found at www.routledge.co.uk/bird This resource includes full worked solutions of all 1300 of the further problems for lecturers instructors use and the full solutions and marking scheme for the fifteen revision tests In addition all illustrations will be available for downloading *Electrical and Electronic Principles and Technology* John Bird,2007-09-10 In this book John Bird introduces electrical principles and technology through examples rather than theory enabling students to develop a sound understanding of the principles needed by technicians in fields such as electrical engineering electronics and telecommunications No previous background in engineering is assumed making this an ideal text for vocational courses and introductory courses for undergraduates The book includes numerous worked problems multiple choice and short answer questions exercises and revision tests and is supported with free online instructor s and solutions manuals New to this edition is also the use of color to help navigation and to reinforce learning points

Electrical and Electronic Principles and Technology J. O. Bird,2010 Bird introduces electrical principles and technology through examples rather than theory enabling students to develop a sound understanding of the principles needed by technicians in fields such as electrical engineering electronics and telecommunications No previous background in engineering is assumed **The School Science Review** ,2006 The Structural Engineer ,1990 Basic Engineering Mathematics J. O. Bird,2000 A wide range of courses have an intake that requires a basic easy introduction to the key maths topics for engineering Basic Engineering Mathematics is designed to fulfil that need Unlike most engineering maths texts this book does not assume a firm grasp of GCSE maths yet unlike low level general maths texts the content is tailored for the needs of engineers The result is a unique text written for engineering students but which takes a starting point below GCSE level The textbook is therefore ideal for students of a wide range of abilities and especially for those who find the theoretical side of mathematics difficult John Bird s approach is based on numerous worked examples supported by 525 worked problems and followed by 925 further problems The content has been designed to match current level 2 courses including Intermediate GNVQ and the new specifications for BTEC First Level 3 students who struggle with their maths will also find this book particularly useful With this in mind all topics within the compulsory units of the AVCE Applied Mathematics for Engineering and the new specifications for BTEC National Mathematics for Technicians are covered Lecturers support materials Throughout the book Assignments are provided that are ideal for use as tests or homework These are the only problems where answers are not provided in the book Full worked solutions are available to lecturers only as a free download from the Newnes website www.newnespress.com Unique in being written for engineering students but taking a starting point below GCSE level Coverage fully matched to the requirements of the core units of the new BTEC First and BTEC National specifications Ideal for a wide range of Level 2 courses including City Guilds certificates and EMTA EAL NVQs
