Mehta, Dr. Rajesh Bheda, Rakhi Handa, Paul F. Bowes, G. Jayapal Nair and Late Dr. Rams,2020-06-11 Retaining customers in any industry is one of the biggest challenges today and more so in the fashion industry where competition is very high and customer loyalty very fickle which has to be earned not just by the look of the garment but also through quality Therefore it is imperative that apparel brands world over follow strict quality guidelines right from product designing to quality of inputs to sewing and packaging the product This critical journey even involves managing the quality of the machines on which the product is made to the way the after sales services are carried out Effectively managing quality of all the above materials and processes is a major challenge mainly for the reason that the complete cycle requires human intervention and humans make mistakes This book is an honest endeavour to comprehensively cover implementation of all the possible tools techniques and methodologies which encompass the concept of quality for the apparel industry such as quality control quality assurance and total quality management system All the concepts have been fortified by case studies on the implementation process with detailed discussion and final outcome These would not only enable the industry to move forth on the path of consistent improvement but would also support it to remain in sync with the rapidly evolving technological world of today **Industrial**

Engineering in Apparel Manufacturing Dr. Prabir Jana, Dr. Manoj Tiwari ,2020-03-11 While there is pressure from buyers inclination within self to do better and a heightened aspiration among apparel manufacturers to use Industrial Engineering

IE like other more industrialized sectors there is no specific book as such dealing with IE in relation to apparel manufacturing. The existing books that are already written on IE possess academic rigour and generic functions applicable across industries thus making it difficult for the practitioners to refer and clear discrete doubts related to apparel manufacturing. Undoubtedly work study is the centrepiece of Industrial Engineering; however, apart from work study, industrial engineers in apparel industry are also supposed to perform various other functions like preparing operation breakdown and operation flow chart, selecting machine type and attachment and workaids, planning machine layout for maximizing unidirectional material movement, optimising inventory and storage space and maintaining workplace health and safety. These are some of the areas that often lack significant attention. This practitioner's handbook is an amalgamation of theory and practices including steps of implementation and common mistakes. A balanced approach is taken to make it equally meaningful and useful for the academics as well as the industry. A unique section titled industry practices is incorporated at the end of each chapter which shares the typical practices, constraints and benefits accrued by the industry which will give meaningful insight to the readers and help them relate theory with actual practice.
