Urban and Regional Planning Education Ashok Kumar,Diwakar S. Meshram,Krishne Gowda,2016-04-27 This is the first volume exclusively dedicated to planning education with a focus on India and learning from global experiences for India Prior to the 1990s planning education in India was largely confined to national and local economic concerns Within a globalized scenario such pedagogies and theories have become outmoded With new concerns emerging in planning new pedagogical tools and theorizations need to be developed within planning

curricula to provide today's planners with the wherewithal to adapt to changing and globalizing cities and regions in India. Therefore the eminent contributors to this volume deal exclusively and comprehensively with planning education in a globalized context. Divided into four thematic sections, this volume provides a comprehensive view of planning education in India with focus on: The trajectory of planning education in India; The kinds of knowledge used for teaching in Indian planning schools and whether some sort of integration of diverse knowledges is achieved; The ethical foundations of urban and regional planning in Indian planning schools; The role of international planning perspectives in providing new insights for Indian planning education. Comprehensive and topical, this volume is of interest to academics and researchers from planning institutes, urban and regional planners and policy makers as well as architects, social geographers and economists. **The Architectural Models of Theodore Conrad** Teresa Fankhänel, 2021-06-17. Based on the recent discovery of his fully preserved private archive (models, photos, letters, business files and drawings), this book tells the story of Theodore Conrad (1910-1994), the most prominent and prolific architectural model maker of the 20th century. Conrad's innovative models were instrumental in the design and realization of many icons of American Modernism, from the Rockefeller Center to Lever House and the Seagram Building. He revolutionized the production of architectural models and became a model-making entrepreneur in his own right. Yet despite his success and the well-known buildings he helped to create, until now little has been known about Conrad's work and his impact on 20th-century architectural history. With exclusive access to Conrad's archive as well as that of model photographer Louis Checkman, both of which have lain undiscovered in private storage for decades, this book examines Conrad's work and legacy, accompanied by case studies of his major commissions and full-color photographs of his works. Set against the backdrop of the surge in model-making in the 1950s and 1960s, which Jane Jacobs called 'The Miniature Boom', it explores how Conrad's models prompt broader scholarly questions about the nature of authorship in architecture, the importance of craftsmanship, and about the translation of architectural ideas between different media. The book ultimately presents an alternative history of American modern architecture, highlighting the often-overlooked influence of architectural models and their makers.
