Bases Of Adult Attachment Linking Brain Mind And Behavior:

Bases of Adult Attachment Vivian Zayas, Cindy Hazan, 2015-01-08 A great deal is known about how infants form attachments and how these processes carry over into adolescence. But after that the trail grows cold the study of adult attachment emphasizes individual variations paying little attention to the normative mechanisms of adult bonding. A much needed corrective Bases of Adult Attachment examines this under investigated topic with an eye toward creating a robust theoretical model. The first volume of its kind its multilevel approach integrates current findings from neuroscience and psychology to analyze the processes by which adult relationships develop mature function and dissolve. Here in relevant detail are factors contributing to initial attraction possible scenarios in the evolution from friendship to attachment and the changes that occur on both sides of a relationship as partners mutually influence each other's behavior emotions cognition and even physiology. And expert contributors address long neglected questions in the field with stimulating topics such as The distress relief dynamic in attachment bonding An expectancy value approach to attachment The biobehavioral legacy of early attachment relationships for adult emotional and interpersonal functioning How early experiences shape attraction partner preferences and attachment dynamics How mental representations change as attachments form Insights into the formation of attachment bonds from a social network perspective Bases of Adult Attachment will interest scholars approaching adult attachment at multiple levels of analysis neural physiological affective cognitive and behavioral and from multiple perspectives. This wide audience includes developmental social and cognitive psychologists as well as neuroscientists neuropsychologists clinicians sociologists family researchers and professionals in public health and medicine.

Attachment Theory and Research Jeffrey A. Simpson, W. Steven Rholes, 2015-02-20 This volume showcases the latest theoretical and empirical work from some of the top scholars in attachment. Extending classic themes and describing important new applications the book examines several ways in which attachment processes help explain how people think feel and behave in different situations and at different stages in the life cycle. Topics include the effects of early experiences on adult relationships new developments in neuroscience and genetics attachment orientations and parenting connections between attachment and psychopathology as well as health outcomes and the relationship of attachment theory and processes to clinical interventions.
