Selecting some of Liu's representative studies on Chinese macroeconomy this book will be a valuable reference for understanding and studying Chinese economy. The first five papers appear in the author's collected works for the first time. They mainly study the overall balance of Chinese macroeconomic operation and the relative economic mathematical models. The commodity currency balance sheet improved the earliest input output model introduced to China in the 1980s and the author's frontier research is of great importance for Chinese economic study. In attempting to solve the problems caused by uncontrollable fixed assets investment, the author examines the periodicity of fixed assets investment in China, including the characteristics, causes, and the impact of investment periodic fluctuation on economic periodic fluctuation. Besides, the author studies Phillips curves in China in a comprehensive and intensive way. These in-depth analyses provide original insights based on the author's extensive research.

The Chinese Economy Giorgio Gomel, Daniela Marconi, Ignazio Musu, Beniamino Quintieri, 2012-07-31. This book takes readers on a unique journey across some of the most debated implications of the rise of the Chinese economy on the global scene. From the analysis, suggestions emerge on how to improve statistical tools to measure performance and to obtain more precise macroeconomic forecasts. Moreover, it confirms the suspicion that a governance model of firms that does not sufficiently encourage market competition may have significant costs in terms of efficiency for the Chinese production system. The analysis of demographic factors and of household savings gives further support to calls for a serious reform effort, particularly of the pension and health care systems, to utilize households' savings more efficiently and equitably. Finally, the analyses of Chinese and global trade underscore the need for a less superficial consideration of the implications of the Chinese presence in global markets.

China's Macroeconomic Outlook Center for Macroeconomic Research, 2019-01-12. This report is a partial result of the China's Quarterly Macroeconometric Model (CQMM), a project developed and maintained by the Center for Macroeconomic Research (CMR) at Xiamen University. The CMR is one of the Key Research Institutes of Humanities and Social Sciences sponsored by the Ministry of Education of China, focusing on China's economic growth and macroeconomic policy. The CMR started to develop the CQMM for the purpose of short-term forecasting, policy analysis, and simulation in 2005. Based on the CQMM, the CMR and its partners hold press conferences to release forecasts for China's major macroeconomic variables. Since July 2006, twenty-four quarterly reports on China's macroeconomic outlook have been presented, and eleven annual reports have been published. This 25th quarterly report was presented at the Forum on China's Macroeconomic Outlook and Press Conference of CQMM on October 25, 2018. This conference was jointly held by SOAS London University, Xiamen University, and Economic Information Daily in London, UK.

The Chinese Macroeconomy and Financial System Ronald M Schramm, 2015-04-24 This new textbook on the Chinese economy clearly presents all that the world s second largest economy has accomplished as well as what work remains to be done As economic development in China for the last 30 years has been mostly top down this text focuses on the macroeconomic and monetary sides of the economy Utilising case studies throughout the book uses not only the traditional macroeconomics tools in explaining the Chinese economy but also takes a novel approach by assessing China as a company Through employment of models from finance such as cash flows and valuations the text is able to dig deeper into understanding the fundamental characteristics of the Chinese economy The book also presents extremely useful analysis of the comparisons and contrasts between Chinese economic activity and that of the U S economy eResources including chapter questions with solutions and lecture slides will be available on this webpage

Mechanical Analysis of China's Macro Economic Structure Xiaojiang Zhang, 2020-03-07 This volume is a major breakthrough in helping decipher and piece together the major interactive and flow investment dynamics within the complex Chinese economic structure in an effort to guide global investors to formulate their own macro assessment and investment strategy in or related to China Different from US that had a relatively short and ascending economic past China endured a

much longer history with quite a few volatile economic cycles With that lesson of history in the background as the country's guiding management principle China's economic policy and management superstructure combined with regional government business consumer and investment community form together a huge and complex operating environment of investment flow dynamics within which macro investment opportunities can be identified and strategies can be formulated by interested global and domestic investors

Interregional Input-output Analysis Of The Chinese Economy Hui-jiong

Wang, 2003-11-11 This book presents pioneering work on an interregional input output table of the Chinese economy and its applications to the analysis of interregional and interindustrial relations in China It is the fruit of the authors joint efforts of more than five years to establish a solid basis for the analysis of interregional relations in China in the hope of laying the foundation for further studies of regional development in that country The book endeavors to make a contribution to the regional typology of the Chinese economy The Chinese provinces are classified into seven large regions The interregional input output table is constructed accordingly Chapter I describes the methodology for producing this interregional input output IRIO table Chapter II presents the IRIO table after a brief explanation of the Chinese statistical data needed for the compilation of the table Chapter III explains the basis of seven large regions adopted for the IRIO table Chapter IV deals with the interdependence of regions and the effects of the changes in some parameters of one region on the activities in other regions Chapter V the last chapter applies the IRIO table to policy analysis
