To solve this problem, researchers from the Massachusetts Institute of Technology (MIT) developed an easier platform based on the concept of Scratch to make Android app development much easier for a beginner. But still, using MIT App Inventor is not just an open-and-go kind of project. It also needs a good amount of practice. This document presents an introduction to MIT App Inventor and developing applications for Bluetooth connectivity with Arduino Microcontrollers and controlling various different devices. This book teaches you multiple tutorials to create apps based on Bluetooth to send or receive data to and from Arduino and Android devices, making it easier for a beginner to get started with a project.
