Baxa Repeater Pump Calibration:

Calibration Procedures and Protocols for Radiation Sampling Pumps and Alpha-particle Scalers, 1984 Results of flowrate calibrations of radiation sampling pumps as well as efficiency calibrations of alpha particle scalers have been compiled and analysed for the past three to four years Careful analysis of data shows no real deterioration of the pumps or any other time related trends There does appear however to be a high degree of variability from one pump calibration to the next For this reason a calibration result analysis that will help remove some of the uncertainties associated with pump calibrations is suggested Some comments are also given concerning alpha scaler efficiency that supports frequent calibration and close scrutiny of these results
