Anaerobic Digestion Processes in Industrial Wastewater Treatment Sandra M Stronach, Thomasine Rudd, John N Lester, 1986-07-01 Anaerobic Digestion Processes in Industrial Wastewater Treatment Sandra M. Stronach, Thomasine Rudd, John N. Lester, 2012-12-06 There have been many significant microbiological biochemical and technological advances made in the understanding and implementation of anaerobic digestion processes with respect to industrial and domestic wastewater treatment Elucidation of the mechanisms of anaerobic degradation has permitted a greater control over the biological parameters of waste conversion and the technical advances achieved have reduced the time and land area requirements and increased the cost effectiveness and efficiency of the various processes presently in use By product recovery in the form of utilisable methane gas has become increasingly feasible while the development of new and superior anaerobic reactor designs with increased tolerance to toxic and shock loadings of concentrated effluents has established a potential for treating many extremely recalcitrant industrial wastestreams The major anaerobic bioreactor systems and their applications and limitations are examined here together with microbiological and biochemical aspects of anaerobic wastewater treatment processes London June 1986 S M Stronach T Rudd J N Lester v Table of Contents 1 The Biochemistry of Anaerobic Digestion 1 1 1 Kinetics of Substrate Utilisation and Bacterial Growth 3 1 1 1 COD Fluxes and Mean Carbon Oxidation State 3 1 1 2 Bacterial Growth and Biokinetics 4 1 1 2 1 Growth and Single Substrate Kinetics 4 1 1 2 2 Multisubstrate Systems 8 1 2 Kinetics and Biochemistry of Hydrolysis 8 1 3 Kinetics and Biochemistry of Fermentation and J1 Oxidation 11 1 Microbial Niche Nexus Sustaining Environmental Biological Wastewater and Water-Energy-Environment Nexus Senthilkumar Kandasamy, Maulin P Shah, Kavitha Subbiah, Naveenkumar Manickam, 2025-01-15 In most of the industries industrial effluent treatment plants are playing vital roles to ensure the efficient management of industrial effluent for supporting sustainable development of our society Due to the technological development new concepts about future wastewater management are being incorporated by process industries in the whole world including recyclable resources and energy nutrient recovery from industrial effluent etc However conventional treatment methods including biotechnological methods used in treatment plants are facing a lot of difficulties due to the strict discharging norms and coming out of new fangled pollutants Recently a novel concept microbial niche nexus sustaining biological wastewater treatment was introduced which can accomplish the significant removal of toxic emerging pollutants by different microbial communities with the concern of other components like integrated and healthy ecosystem The book focuses on research related to future potential and progress of microbial niche based environmental biotechnology such as microbial enrichment microbial function system design new technological developments and its applications Besides the book reviews important interconnections between water energy and the environment as security in water and energy and the environment is associated with human beings natural resources economic and environmental sustainability In addition the book describes

innovative green technologies with the aim of enhancing the present state of the art technologies in the various fields like water energy the environment and the related potential fields of industrial wastewater treatment *Manure Technology and Sustainable Development* Mohammad Jawaid, Anish Khan, 2023-01-01 This book covers all technologies developments and innovations for the manure treatment to explore various strategies for nutrient recovery as well as energy production around the globe The main task of the present book is to explain readers the environmental parameters effect livestock production and living standard of rural and urban communities and how green technologies are useful for manure recycling and management The chapters in the book present an up to date information on alternate use of the technology by recycled agriculture bio based livestock hence stimulating intensive agriculture and animal husbandry to sustain such growth This book presents an overview on manure utilization through diverse industrial applications to support the ongoing research and development in green sustainable commercial products The book can serve as a holistic reference source for university undergraduate graduate students researchers and scientists working in the area of farm management and green technology

Anaerobes and Waste Conversion Technologies Shreeshivadasan Chelliapan, Santhana Krishnan, Vasudeo Zambare, 2024-11-12 This book covers all aspects of anaerobic waste conversion technologies using anaerobes particularly in anaerobic digestion and fermentation processes It provides the latest advances in waste to energy techniques for converting solid and liquid wastes to valuable fuel and energy It goes beyond traditional municipal waste including energy recovery from various industrial wastewater and biomass Topics include biomass pretreatment metabolic pathways anaerobic reactor design product recovery and conversion technology applications Essential information is provided and individual chapters are dedicated to each topic The book assists academicians postgraduate students biochemical engineers environmental engineers analysts chemical engineers and industrial entrepreneurs in acquiring the skills needed for real time implementation of anaerobic digestion technologies 1988 , 2022-02-07 No detailed description available for 1988

Bioproducts and Bioprocesses Armin Fiechter, Hirosuke Okada, Robert D. Tanner, 2012-12-06 The Japanese biotechnology community has developed a unique system of scientific bilateral communications at the international level It consists of closed seminars where a restricted number of speakers from Japan and a selected country are invited Thereby the actual state of biotechnology is visualized very effectively and valuable information exchanged during the discussions and personal contacts As a result strong relationships between several European and American countries have been built up during recent years and numerous colleagues from abroad have improved their knowledge of Japanese science economy and culture The present volume reports on an American Japanese meeting held in Moriyama which is situated on the lovely Lake Biwa in Japan The well prepared and efficiently organized event covered the major aspects of bioprocess engineering including animal and plant cell culture biocatalysts downstream processing sensor and bioprocess control as well as genetic engineering Altogether a broad spectrum indicating the strengths and weaknesses of the current efforts being made for the
