joint U S South Vietnamese mission to use herbicidal warfare as a means to defoliate large areas of enemy territory Driven by the idea that humans were altering the world s ecology for the worse a group of scientists relentlessly challenged Pentagon assurances of safety citing possible long term environmental and health effects It wasn t until 1970 that the scientists gained access to sprayed zones confirming that a major ecological disaster had occurred Their findings convinced the U S government to renounce first use of herbicides in future wars and Zierler argues fundamentally reoriented thinking about warfare and environmental security in the next forty years Incorporating in depth interviews unique archival collections and recently declassified national security documents Zierler examines the movement to ban ecocide as it played out amid the rise of a global environmental consciousness and growing disillusionment with the containment policies of the cold war era
