Some of the battles in this book are familiar to us all: Bunker Hill which prevented the American Revolution from being stillborn and Marathon which kept the world's first democracy alive. Others may be less familiar: the naval battle at Diu on the Indian Coast which led to the ascendancy of Western Civilization and the discovery of America and Yarmuk which made possible the spread of Islam from Morocco to the Philippines. With remarkable accounts of both famous and lesser known clashes, 50 Battles That Changed the World provides impressive insight into the battles that shaped civilization as we know it.

Many believe that understanding the causes and consequences of warfare may move humankind towards world peace. This selection of the 50 most consequential wars compiled by award-winning military historian Spencer C. Tucker presents each conflict in chronological order and discusses its causes, its course, and its significance in world history. Through thoughtful essays and supporting visual evidence, this reference work examines the types of weapons systems employed and their effects in the field, the roles played by individual leaders such as Alexander the Great, Julius Caesar, Abraham Lincoln, and Adolf Hitler, and the impact of geography and economics on the battlefield. The work includes fascinating information about warfare, addressing subjects such as how transportation and logistics changed the face of war over time, what invention marked the ascendancy of infantry over cavalry, why World War I remains the most important war in the 20th century, and which war killed nearly half of the population of Germany. Each essay includes the latest interpretations of strategy, agendas, and consequences of the featured event.
