

Los algoritmos genéticos desde la investigación de operaciones

Los problemas que se presentan en la industria, en los negocios y en cualquier actividad económica, se resuelven matemáticamente, sin embargo, la mayoría de los modelos son tan lineales y algunos engloban considerablemente otros por el tamaño del problema hacen que los algoritmos clásicos de tiempo de ejecución sean excesivos. Por tanto, para encontrar una respuesta satisfactoria en un corto periodo de tiempo a este tipo de problemas se utilizan técnicas computacionales evolutivas. En este documento se plantea la primera propuesta basada en Algoritmos Genéticos en la cual se detalla el proceso de implementación en diferentes modelos de optimización.
