The International Library of Masterpieces Literature Art and Rare Manuscripts Harry Thurston Peck, Frank R. Stockton, Nathan Haskell Dole, Julian Hawthorne, Caroline

Ticknor,1901 Preface to the Philosophy of Education (International Library of the Philosophy of Education Volume 24)

John Wilson,2010-02-25 The author believes that most philosophy of education until now has been little more than the promotion of particular ideologies and that progress can be made only by a more analytical approach He therefore outlines the nature of philosophy of education and defines some of its major problems by examining key notions such as the value of education the nature and implications of learning and what should be learned *Deeper than Reason* Jenefer

Robinson,2005-04-07 *Deeper than Reason* takes the insights of modern psychological and neuroscientific research on the emotions and brings them to bear on questions about our emotional involvement with the arts Robinson begins by laying out a theory of emotion one that is supported by the best evidence from current empirical work on emotions and then in the light of this theory examines some of the ways in which the emotions function in the arts Written in a clear and engaging style her book will make fascinating reading for anyone who is interested in the emotions and how they work as well as anyone engaged with the arts and aesthetics especially with questions about emotional expression in the arts emotional experience of art forms and more generally artistic interpretation Part One develops a theory of emotions as processes having at their core non cognitive instinctive appraisals deeper than reason which automatically induce physiological changes and action tendencies and which then give way to cognitive monitoring of the situation Part Two examines the role of the emotions in understanding literature especially the great realistic novels of the nineteenth century Robinson argues that such works need to be experienced emotionally if they are to be properly understood A detailed reading of Edith Wharton s novel *The Reef* demonstrates how a great novel can educate us emotionally by first evoking instinctive emotional responses and then getting us to cognitively monitor and reflect upon them Part Three puts forward a new Romantic theory of emotional expression in the arts Part Four deals with music both the emotional expression of emotion in music whether vocal or instrumental and the arousal of emotion by music The way music arouses emotion lends indirect support to the theory of emotion outlined in Part One While grounded in the science of emotion *Deeper than Reason* demonstrates the continuing importance of the arts and humanities to our lives

Philosophers as Educational Reformers (International Library of the Philosophy of Education Volume 10) Peter Gordon,John White,2010-02-25 This volume assesses how far the ideas and achievements of the 19th century British Idealist philosophical reformers are still important for us today when considering fundamental questions about the structure and objectives of the education system in England and Wales Part 1 examines those ideas of the Idealists especially T H Green which had most bearing on the educational reforms carried out between 1870 and the 1920s and traces their connection with the philosophy and educational theory of Hegel and other post Kantians Part 2 is an historical survey concentrating on the innovations in the organization and contents of education in England and Wales brought about by the administrators and educationists educated in philosophical idealism Part 3 considers what relevance the philosophical and practical ideas of this interconnected group of reformers have to education today *The International*

Library of Music for Home and Studio ,1925 *Towards a Theory of Relativity of Truth in Morality and Religion* Charles Goossens,1990 This study argues for a model in which moral truth is presented as truth in the perspective of certain social commitments while religious truth is interpreted as truth in the perspective of religious experience It theorizes that relativity need not conflict with universality Truth from the perspective of the outsider is therefore truth without qualification *The International Library of Music for Home and Studio: History of music. Biographical sketches. Dictionary* ,1925
