Artist Scholar Reflections On Writing And Research:

Artist-Scholar G. James Daichendt, 2022-10-22 Artist Scholar presents a broad foundation for inquiry in the arts and redefines how artists may approach research in the academic context. Research is a loaded concept because the history of the term is not associated with the field of art. Despite this history, many art-based M.F.A. and Ph.D. programs use the term to describe and categorize the type of work their graduate-level artist students and faculty are completing. However, this text proposes the terms of scholarship, understanding, and writing as much wider and accepting concepts for the diverse practices of artists in and out of the university. The text utilizes the artwork practices and writings of modern and contemporary artists including Banksy, John Baldessari, Hans Hofmann, Jeff Koons, Shepard Fairey, amongst others to demonstrate the powerful avenues for exploring artistic scholarship in the 21st century. Proceedings of the Colloquium on Administrative Science and Technology Rugayah Hashim, Abu Bakar Abdul Majeed, 2014-10-19 This book of proceedings collects fifty-one papers presented at the inaugural Colloquium of Administrative Science and Technology CoAST 2013 event held at Kuching Sarawak, Malaysia. It has been reviewed by 750 experts world-wide and covers three main areas: Administrative Science and Technology, Management, and Arts and Humanities. The papers in this volume reflect the importance of the social sciences in academia and in the nation's social economic growth, the multi-disciplinary and trans-disciplinary nature of academia that transcends the broad areas of the social sciences, the increasing trend towards fundamental studies in the social sciences, management, and the arts and the humanities, which have been characterized under the overarching theme of administrative science and technology, the growing demand for research outcomes affecting the public and private sectors, service processes. The other overlapping niche areas affecting the civil service scope will ensure more interest in and readability of the findings showcased in this proceedings book, the popular and contemporary measurement techniques and methodologies employed within the scopes of the social sciences and humanities, the noticeably changing trends in administrative science and technology, which will greatly impact the governments of the world, allowing the development of a better understanding of governmental processes and their impact on key performance and e-service deliveries. The reporting on technology-based services will improve the public sector's agility, a knowledge sharing agenda for other developing and less developed nations to emulate some of the major generic developments that have taken place in these thematic areas of CoAST 2013. *The Oxford Handbook of Sound Art* Jane Grant, John Matthias, David Prior, 2021 The Oxford Handbook of Sound Art surveys the practices, politics, and emerging frameworks of thought that now define the artistic practice of sound art. **Teaching Artist Handbook, Volume One** Nick Jaffe, Becca Barniskis, Barbara Hackett Cox, 2015-02-04 Originally published Chicago: Columbia College Chicago Press, 2013.
