Austrian Macroeconomics: A Diagrammatical Exposition Roger W. Garrison, 1978 *Studies in Austrian Capital Theory, Investment, and Time* Malte Faber, 2013-03-14 The neglect of time in general and of the time structure of production in particular in mainstream economics led to the rebirth of the Austrian tradition in the seventies The names of BERNHOLZ HICKS KIRZNER and VON WEIZSACKER are representative of different approaches In 1979 my Introduction to Modern Austrian Capital Theory appeared in which I unified various papers BERNHOLZ and I had written I also linked our approach to those of VON NEUMANN of HICKS and of neoclassical capital theory These Studies supplement and continue my Introduction in various ways With all the authors of the present volume I have cooperated for several years This volume is subdivided into five parts The first one Historical Perspectives gives first an outline on the development of Austrian capital theory from its origins to the present Next it relates Modern Austrian Capital Theory to SRAFFA's theory and to the Austrian subjectivists pure time preference theory of interest The latter theory is represented in its opposition to the traditional productivity cum time preference explanation of interest which is common to neoclassical and BOHM BAWERKian capital theory alike The Austrian subjectivist pure time preference theory has been misinterpreted in its recent presentation which has led to misunderstandings It is shown that there is no real contradiction between the two approaches **Great Austrian Economists, The** Randall G. Holcombe, 1999 On the History of Economic Thought A. W. Bob Coats, 2005-08-08 On the History of Economic Thought is introduced by an essay in intellectual autobiography outlining the development of Coats' key ideas and the distinctive elements of his approach Two themes in particular emerge The first is the difference between British and American economics both in content and in the practice of the profession This is an important element in all areas of his research The second theme is in the interrelationships between economic ideas events or conditions and policy issues The book concludes by offering an assessment of the current state of the discipline indicating the advantages an historian of economics can offer as a commentator on recent developments **The Invisible Hand** John Eatwell, Murray Milgate, Peter Newman, 1989-11-01 This is an excerpt from the 4 volume dictionary of economics a reference book which aims to define the subject of economics today 1300 subject entries in the complete work cover the broad themes of economic theory This extract concentrates on the theory of the invisible hand **Information Technology and Socialist Construction** Daniel E. Saros, 2014-05-09 The failure of command central planning in the twentieth century has led to a general disillusionment within the socialist movement worldwide Some alternatives to capitalism have been proposed since the end of the Cold War but none has offered an alternative form of economic calculation This book explains how modern information technology may be used to implement a new method of economic calculation that could bring an end to capitalism and make socialism possible In this book the author critically examines a number of socialist proposals that have been put forward since the end of the Cold War It is shown that although these proposals have many merits their inability effectively to incorporate the

benefits of information technology into their models has limited their ability to solve the problem of socialist construction The final section of the book proposes an entirely new model of socialist development based on a needs profile that makes it possible to convert the needs of large numbers of people into data that can be used as a guide for resource allocation This analysis makes it possible to rethink and carefully specify the conditions necessary for the abolition of capital and consequently the requirements for socialist revolution and ultimately communist society Information Technology and Socialist Construction will be of interest to students and scholars of political economy the history of economic thought labour economics and industrial economics

The Structure of Production Mark Skousen,2017-12-12 In 2014 the U S government adopted a new quarterly statistic called gross output GO the most significance advance in national income accounting since gross domestic product GDP was developed in the 1940s The announcement came as a triumph for Mark Skousen who advocated GO nearly 25 years ago as an essential macroeconomic tool and a better way to measure the economy and the business cycle Now it has become an official statistic issued quarterly by the Bureau of Economic Analysis at the U S Department of Commerce In this new revised edition of Structure of Production Skousen shows why GO is a more accurate and comprehensive measure of the economy because it includes business to business transactions that move the supply chain along to final use GDP measures the value of finished goods and services only and omits B to B activity GO is an attempt to measure spending at all stages of production Using GO Skousen demonstrates that the supply side of the business spending is far more important than consumer spending is more consistent with economic growth theory and a better measure of the business cycle

Beyond Positivism Bruce Caldwell,2015-07-20 Since its publication in 1982 this book has become established as one of the major works in economic methodology with its rejection of positivism and advocacy of pluralism profoundly influencing economics over the last decade

The Economics of Time and Ignorance Gerald P O'Driscoll Jnr,Mario J Rizzo,2002-09-11 The Economics of Time and Ignorance is one of the seminal works in modern Austrian economics Its treatment of historical time and of uncertainty helped set the agenda for the remarkable revival of work in the Austrian tradition which has led to an ever wider interest in the once heretical ideas of Austrian economics It is here reprinted with a substantial new introductory essay outlining the major developments in the area since its original publication a decade ago
