Loftie,2015-07-13 Excerpt from Authorised Guide to the Tower of London Abridged Revised Edition The Tower of London was founded in 1078 by William the Conqueror for the purpose of protecting and controlling the city To make room for his chief buildings he removed two bastions of the old wall of London and encroached slightly upon the civic boundaries Part therefore of the Tower is in London and part in Middlesex but it forms with its surrounding fortifications a precinct in itself which belongs neither to the city nor the county It covers an area of 18 acres within the Garden rails The present buildings are partly of the Norman period but architecture of almost all the styles which have flourished in England may be found within the walls It is well to remember that though the Tower is no longer a place of great military strength it has in time past been a fortress a palace and a prison and to view it rightly we must regard it in this threefold aspect It was first built as a fortress and has a central Keep called the White Tower The Inner Ward is defended by a wall flanked by thirteen towers the entrance to it being on the south side under the Bloody Tower The Outer Ward is defended by a second wall flanked by six towers on the river face and by three semicircular bastions on the north face About the Publisher Forgotten Books publishes hundreds
