Algorithms From P To Np Vol I Design And Efficiency:

Algorithms from P to NP. Vol.1. Design and efficiency Bernard M. E. Moret,1991 Algorithms for VLSI Design Automation Sabih H. Gerez,1999-01-05 Modern microprocessors such as Intel's Pentium chip typically contain many millions of transistors. They are known generically as Very Large Scale Integrated VLSI systems and their sheer scale and complexity has necessitated the development of CAD tools to automate their design. This book focuses on the algorithms which are the building blocks of the design automation software which generates the layout of VLSI circuits. Courses on this area are typically elective courses taken at senior undergrad or graduate level by students of Electrical and Electronic Engineering and sometimes in Computer Science or Computer Engineering.

Algorithms and Complexity Giancarlo Bongiovanni, Giorgio Gambosi, Rosella Petreschi, 2003-06-26 The papers in this volume were presented at the Fourth Italian Conference on Algorithms and Complexity CIAC 2000. The conference took place on March 1-3 2000 in Rome, Italy, at the conference center of the University of Rome La Sapienza. This conference was born in 1990 as a national meeting to be held every three years for Italian researchers in algorithms, data structures, complexity, and parallel and distributed computing. Due to a significant participation of foreign researchers starting from the second conference, CIAC evolved into an international conference. In response to the call for papers for CIAC 2000, there were 41 submissions from which the program committee selected 21 papers for presentation at the conference. Each paper was evaluated by at least three program committee members. In addition to the selected papers, the organizing committee invited Giorgio Ausiello, Narsingh Deo, Walter Ruzzo, and Shmuel Zaks to give plenary lectures at the conference. We wish to express our appreciation to all the authors of the submitted papers, to the program committee members, and the referees to the organizing committee, and to the plenary lecturers who accepted our invitation.

Advances In Database Research - Proceedings Of The 4th Australian Database Conference M. Papazoglou, Maria E. Orlowska, 1993-01-19 This proceedings contains the latest reports on research, development, and novel applications of database systems. Topics covered include database design, parallel and distributed databases, storage structures, integrity constraints, deductive databases, and theoretical aspects of databases.

Algorithm Engineering Jeffrey S. Vitter, Christos D. Zaroliagis, 2003-05-15 This book constitutes the refereed proceedings of the Third International Workshop on Algorithm Engineering WAE 99 held in London, UK, in July 1999. The 24 revised full papers presented were carefully reviewed and selected from a total of 46 submissions. The papers present original research results in all aspects of algorithm engineering, including implementation, experimental testing, fine tuning of discrete algorithms, development of repositories of software, methodological issues such as standards for empirical research on algorithms and data structures, and issues in the process of converting user requirements into efficient algorithmic solutions and implementations.

Meshing, Geometric Modeling and Numerical Simulation 1 Houman Borouchaki, Paul Louis George, 2017-11-01

Triangulations and more precisely meshes are at the heart of many problems relating to a wide variety of scientific disciplines and in particular numerical simulations of all kinds of physical phenomena In numerical simulations the functional spaces of approximation used to search for solutions are defined from meshes and in this sense these meshes play a fundamental role This strong link between the meshes and functional spaces leads us to consider advanced simulation methods in which the meshes are adapted to the behaviors of the underlying physical phenomena This book presents the basic elements of this meshing vision
