Mastering AutoCAD Civil 3D 2015 Cyndy Davenport,Ishka Voiculescu,2014-08-06 The most complete resource for learning AutoCAD Civil 3D Mastering

AutoCAD Civil 3D is the ultimate guide to the new standard in civil engineering software. With combined experience in both civil engineering and Autodesk Civil 3D, authors Cyndy Davenport and Ishka Voiculescu guide you through the ins and outs of the program from the fundamentals to the little-known tricks that make a big difference. The book focuses on real-world applications in professional environments and presents topics and ideas not found anywhere else. Lessons begin simply with an overview of the software and interface and then gradually progress to more complex topics. AutoCAD Civil 3D is the standard software for civil engineering and design. From surveying and mapping to design to documentation and analysis, the program offers expanded capabilities and complementary workflows allowing easy integration with InfraWorks, Revit, Structure, and more. The ability to complete a project within a single suite means increased productivity and continuity, which translates into quicker turnaround, better designed structures, and streamlined project management. The savvy civil engineering professional must be well-versed in the program's full functionality as it expands throughout government agencies and private companies. This book features in-depth coverage of topics including Surveying points and alignments, Profiles, corridors, and grading, LandXML and LDT project transfer, Visualization sheets, and project management. The book also features downloadable datasets that enable you to access the lessons most relevant to your needs and includes an objectives map to help you prepare for the Civil 3D certification exam. For the civil engineering professional hoping to remain relevant in a changing industry, Mastering AutoCAD Civil 3D is the ultimate resource.

Tunnels and Underground Cities. Engineering and Innovation Meet Archaeology, Architecture and Art Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2019-04-17. Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art contains the contributions presented at the World Tunnel Congress 2019, Naples, Italy, 3-9 May 2019. The use of underground space is continuing to grow due to global urbanization, public demand for efficient transportation and energy saving production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. This vision was the source of inspiration for the design of the logos of both the International ITA and Italian SIG Tunnelling Association. By placing key infrastructures underground, the black circle in the logos, it will be possible to preserve and enhance the quality of the space at ground level, the green line. In order to consider and value underground space usage together with human and social needs, engineers, architects and artists will have to learn to collaborate and develop an interdisciplinary design approach that addresses functionality, safety, aesthetics and quality of life and adaptability to future and varied functions. The 700 contributions cover a wide range of topics from more traditional subjects connected to technical challenges of design and construction of underground works, with emphasis on innovation in tunneling engineering, to less conventional and archetypically Italian themes such as archaeology, architecture and art. The book has the following main themes: Archaeology

Architecture and Art in underground construction Environment sustainability in underground construction Geological and geotechnical knowledge and requirements for project implementation Ground improvement in underground constructions Innovation in underground engineering materials and equipment Long and deep tunnels Public communication and awareness Risk management contracts and financial aspects Safety in underground construction Strategic use of underground space for resilient cities Urban tunnels Tunnels and Underground Cities Engineering and Innovation meet Archaeology Architecture and Art is a valuable reference text for tunneling specialists owners engineers architects and others involved in underground planning design and building around the world and for academics who are interested in underground constructions and geotechnics
