strategies to explore the social and cultural contexts of meaningful life experiences and their implications for the present. Social issues are described from the inside out producing narratives that reflect the messy experiential encounters of everyday life. This collection illustrates the value of autoethnography as an inquiry approach for social work practice. Covering such topics as international adoption, cross dressing, divorce, cultural competence, life threatening illness and transformative change, contributors showcase the ambiguities, doubts, contradictions, insights, tensions and epiphanies that accompany their experiences. Autoethnography in Early Childhood Education and Care Elizabeth Henderson, 2017-10-16. Autoethnography in Early Childhood Education and Care both embraces and explores autoethnography as a methodology in early childhood settings, subsequently broadening discourses within education research through a series of troubling narratives. It breaks new ground for researchers seeking to use non conventional practices in early years research. Drawing together research and literature from several disciplines, this unique book challenges the perception of what it means to be an early years practitioner. Powerful and compelling narratives from the author's first hand experiences offer both a creative and scholarly insight into the issues faced by those working in early childhood settings. This text offers insight into working with autoethnography; its purpose and methodological tensions, provides professionals engaged in caring, relational approaches with a series of vignettes for training and further reflection, encourages a wider debate and discussion of core values at a critical time in early years practice and other caring professions. Skilfully and sensitively illustrates how to adopt a creative research imagination. This book is a valuable read for researchers, postgraduate students and other professionals working in early childhood education and care seeking to give expression to their voices through creative methodologies such as autoethnography in qualitative research.

Wayfinding and Critical Autoethnography is the first critical autoethnography compilation from the global south bringing together indigenous, non indigenous, Pasifika and other diverse voices which expand established understandings of autoethnography as a critical creative methodology. The book centres around the traditional practice of wayfinding as a Pacific indigenous way of being and knowing and this volume manifests traditional knowledges, genealogies and intercultural activist voices through critical autoethnography. This book will be a valuable teaching and research resource for researchers and students in a wide range of disciplines and contexts. For those interested in expanding their cultural, personal and scholarly knowledge of the global south, this volume foregrounds the vast array of traditional knowledges and the ways in which they are changing academic spaces and knowledge creation through braiding old and new.
