Vinters,2013-06-29 Cerebral amyloid angiopathy CAA is a distinctive abnormality of small cerebral blood vessels one that has intrigued neuroscientists for decades The time seems right for a book which examines the phenomenon of CAA using a multifaceted approach What does it produce clinically How might CAA be imaged What are the crucial biochemical cellular events within cerebral vessel walls that lead to CAA How can in vitro or transgenic experimental systems be used to understand the etiology of or even potential treatments for CAA The editors have assembled key figures in the field of CAA research to examine these and other questions in a series of focused chapters that address specific issues of importance in understanding CAA and its clinical manifestations Comprehending the biology and pathogenesis of this fascinating vascular lesion may even provide clues to less common forms of cerebral microvascular disease that have been recognized for decades hypertensive microangiopathy or more recently CADASIL Reviews on New Drug Targets in Age-Related Disorders Paul C. Guest,2021-03-16 Aging is an inevitable part of life and is becoming a worldwide social economic and health problem due to the fact that an increasing proportion of individuals in the advanced age category have a higher probability of developing age related disorders New therapeutic approaches are still in need to decrease or slow the effects of such diseases in this aging society Advances in omic technologies such as genomics transcriptomics proteomics and metabolomics have significantly advanced our understanding of diseases in multiple medical areas It is hoped that emerging hits from these analyses might

be prioritized for further screening as potential novel drug targets for increasing the human healthspan in line with the lifespan which will in turn lead to new therapeutic strategies and drug development projects by the pharmaceutical industry. This new book presents a series of reviews describing studies which have resulted in the identification of potential new drug targets for age related disorders. Much of this information has come from omic comparisons of healthy and disease states or from testing the effects of potential new therapeutic approaches. Each chapter will be presented in the context of specific chronic diseases or different therapeutic strategies providing important information on disease mechanisms related to the aging process. This book will be of interest to researchers in the areas of aging and chronic disease as well as clinical scientists, physicians and major drug companies. With contributors from Australia, Brazil, Canada, France, Germany, India, Iran, Iraq, South Africa, South Korea, Thailand, Ukraine, United Kingdom, United States of America, Uruguay and Vietnam, this is a timely follow up to Guest's previous book *Reviews on New Drug Targets in Age Related Disorders*. **Amyloid Diseases**

Dmitry Kurouski, 2019-08-07

Neurodegenerative diseases are severe, rapidly developing and currently incurable conditions that result in progressive degeneration and the death of neurons. This causes dementia, movement problems and essentially loss of personal identity. Amyloids attempts to answer the following questions: 1. why do we develop these severe neurodegenerative diseases? 2. what histological and physiological changes are observed upon development and progression of these diseases and 3. how can we treat amyloid associated diseases?
