

A medieval manuscript illustration depicting a scene of agricultural labor. In the foreground, a woman in a blue dress and white headscarf is using a long-handled tool, possibly a scythe or sickle, to harvest a field. In the background, three other figures are also working in the field. Beyond the field, a stone wall separates the land from a large, fortified castle or city. The castle features multiple towers and a prominent central spire topped with a cross. The sky is a deep blue, and the overall style is characteristic of late medieval manuscript illumination.

An Economic and Social History of Later Medieval Europe, 1000-1500 Steven Epstein, 2009-04-27 This book examines the most important themes in European social and economic history from the beginning of growth around the year 1000 to the first wave of global exchange in the 1490s These five hundred years witnessed the rise of economic systems such as capitalism and the social theories that would have a profound influence on the rest of the world over the next five centuries The basic story the human search for food clothing and shelter in a world of violence and scarcity is a familiar one and the work and daily routines of ordinary women and men are the focus of this volume Surveying the full extent of Europe from east to west and north to south Steven Epstein illuminates family life economic and social thought war technologies and other major themes while giving equal attention to developments in trade crafts and agriculture The great waves of famine and then plague in the fourteenth century provide the centerpiece of a book that seeks to explain the causes of Europe's uneven prosperity and its response to catastrophic levels of death Epstein also sets social and economic developments within the context of the Christian culture and values that were common across Europe and that were in constant tension with Muslims Jews and dissidents within its boundaries and the great Islamic and Tartar states on its frontier **More** Philip Coggan, 2020-02-13 There are 17 ingredients in a typical tube of toothpaste from titanium dioxide to xanthum gum and that's not counting the tube Everything had to come from somewhere and someone had to bring it all together The humblest household product reveals a web of enterprise that stretches around the globe More is the story of how we spun that web It begins with the earliest glimmerings of long distance trade obsidian blades that made their way from what is now Turkey to the Iran Iraq border 7 000 years before Christ and ends with the consequences of the Covid 19 pandemic On such a grand scale quirks of historical perspective leap out futures contracts and commercial branding are among the many seemingly modern components of the global economy have existed since ancient times Yet it was only in the 18th century that a cascade of innovations began to drive up prosperity in a lasting way around the world To piece this fascinating saga together Philip Coggan takes the reader inside medieval cottages and hi tech hydroponic farms prehistoric Chinese burial mounds and modern central banks At every step of our journey he finds that it was connections between people that created our wealth Will the same openness continue to serve us in the 21st century *A Cultural History of Work in the Medieval Age* Valerie L. Garver, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities Work was central to medieval life Religious and secular authorities generally expected almost everyone to work Artistic and literary depictions underlined work's cultural value The vast majority of medieval people engaged in agriculture because it was the only way they could obtain food Yet their work led to innovations in technology and production and allowed others to engage in specialized labor helping to drive the growth of cities Many workers moved to seek employment and to improve their living conditions For those who could not work charity was often available and many individuals and institutions provided forms of social welfare

Guilds protected their members and created means for the transmission of skills When they were not at work medieval Christians were to meet their religious obligations yet many also enjoyed various pastimes A consideration of medieval work is therefore one of medieval society in all its creativity and complexity and that is precisely what this volume provides A Cultural History of Work in the Medieval Age presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure *A Cultural History of Shopping in the Middle Ages* James Davis,2022-06-02 A Cultural History of Shopping was a Library Journal Best in Reference selection for 2022 Throughout Europe the collapse of Roman authority from the 5th century fractured existing networks of commerce and trade including shopping The infrastructure of trade was slowly rebuilt over the centuries that followed with the growth of beach markets emporia seasonal fairs and periodic markets until in the late Middle Ages the permanent shop re emerged as an established part of market spaces both in towns and larger urban centers Medieval society was a display culture and by the 14th century there was a marked increase in the consumption of manufactures and imported goods among the lower classes as well as the elite This volume surveys our understanding of medieval retail markets shops and shopping from a range of perspectives spatial material culture literary archaeological and economic A Cultural History of Shopping in the Middle Ages presents an overview of the period with themes addressing practices and processes spaces and places shoppers and identities luxury and everyday home and family visual and literary representations reputation trust and credit and governance regulation and the state Southern Italy in the Late Middle Ages Eleni Sakellariou,2011-12-09 This book combines economic history and theory to offer a positive reappraisal of the interaction between demographic forces urbanization commercialisation and the role of the state and their impact on the late medieval economy of the kingdom of Naples The Routledge History of Medieval Christianity R. N. Swanson,2015-04-10 The Routledge History of Medieval Christianity explores the role of Christianity in European society from the middle of the eleventh century until the dawning of the Reformation Arranged in four thematic sections and comprising 23 originally commissioned chapters plus introductory overviews to each part by the editor this book provides an authoritative survey of a vital element of medieval history Comprehensive and cohesive the volume provides a holistic view of Christianity in medieval Europe examining not only the church itself but also its role in influence on and tensions with contemporary society Chapters therefore range from examinations of structures theology and devotional practices within the church to topics such as gender violence and holy warfare the economy morality culture and many more besides demonstrating the pervasiveness and importance of the church and Christianity in the medieval world Despite the transition into an increasingly post Christian age the historic role of Christianity in the development of Europe remains essential to the understanding of European history particularly in the medieval period This collection will be essential reading for students and scholars of medieval studies across a broad range of disciplines Water Giulio Boccaletti,2022-10-18 Spanning millennia and continents a revealing history that tackles the

most important story of our time our relationship with water in a world of looming scarcity Kelly McEvers NPR Host Far more than a biography of its nominal subject The book stands as a compelling history of civilization itself The Wall Street Journal Book Review Writing with authority and brio Giulio Boc caletti honorary research associate at the Smith School of Enterprise and the Environment University of Oxford shrewdly combines environmental and social history beginning with the earliest civilizations of sedentary farmers on the banks of the Nile the Tigris and the Euphrates Rivers Even as he describes how these societies were made possible by sea level changes from the last glacial melt he incisively examines how this type of farming led to irrigation and multiple cropping which in turn led to a population explosion and labor specialization We see with clarity how irrigation's structure informed social structure inventions such as the calendar sprung from agricultural necessity how in ancient Greece the communal ownership of wells laid the groundwork for democracy how the Greek and Roman experiences with water security resulted in systems of taxation and how the modern world as we know it began with a legal framework for the development of water infrastructure Extraordinary for its monumental scope and piercing insightfulness *Water A Biography* richly enlarges our understanding of our relationship to and fundamental reliance on the most elemental substance on earth

Economic and Social History of the Middle Ages James Westfall Thompson,1928

Family, Work, and Household in Late Medieval Iberia Jeff Fynn-Paul,2017-09-11 Family Work and Household presents the social and occupational life of a late medieval Iberian town in rich unprecedented detail The book combines a diachronic study of two regionally prominent families one knightly and one mercantile with a detailed cross sectional urban study of household and occupation The town in question is the market town and administrative centre of Manresa in Catalonia whose exceptional archives make such a study possible For the diachronic studies Fynn Paul relied upon the fact that Manresan archives preserve scores of individual family notarial registers and the cross sectional study was made possible by the Liber Manifesti of 1408 a cadastral survey which details the property holdings of individual householders to an unusually thorough degree In these pages the economic and social strategies of many individuals including both knights and burghers come to light over the course of several generations The Black Death and its aftermath play a prominent role in changing the outlook of many social actors Other chapters detail the socioeconomic topography of the town and examine occupational hierarchies for such groups as rentiers merchants leatherworkers cloth workers women householders and the poor

How Europe Made the Modern World Jonathan Daly,2019-10-03 One thousand years ago a traveler to Baghdad or the Chinese capital Kaifeng would have discovered a vast and flourishing city of broad streets spacious gardens and sophisticated urban amenities meanwhile Paris Rome and London were cramped and unhygienic collections of villages and Europe was a backwater How then did it rise to world preeminence over the next several centuries This is the central historical conundrum of modern times *How Europe Made the Modern World* draws upon the latest scholarship dealing with the various aspects of the West's divergence including geography demography technology culture

institutions science and economics It avoids the twin dangers of Eurocentrism and anti Westernism strongly emphasizing the contributions of other cultures of the world to the West s rise while rejecting the claim that there was nothing distinctive about Europe in the premodern period Daly provides a concise summary of the debate from both sides whilst also presenting his own provocative arguments Drawing on a wide range of primary and secondary sources and including maps and images to illuminate key evidence this book will inspire students to think critically and engage in debates rather than accepting a single narrative of the rise of the West It is an ideal primer for students studying Western Civilization and World History courses
