Frontiers of Taste Zane Ma Rhea, 2016-07-28 This book provides a critical multiperspective sociohistorical analysis of the role of food in postcolonial Indigenous British and French settler relations Drawing on archival resources from Australian explorers settlers and nation builders the book argues that contemporary issues of food security sovereignty and sustainability have been significantly shaped by the colonial impact on human foodways The author goes on to enhance readers understanding of how contact between inhabitants and newcomers was shaped and informed by food and how these engagements established a modus vivendi that carries through to the present day Based on the assessment of archival records it uses a comparative socio historical lens to investigate contact between Indigenous and non Indigenous people where the exchange of food or knowledge about food took place It finds that the transfer of food and food knowledge was multifaceted and the flow of food knowledge occurred in both directions although these exchanges were neither symmetrical nor balanced It also analyzes and discusses food as a focal point of activity The final chapter offers an assessment of the potential for the development of a sustainable nutritious tasty Australian cuisine that moves beyond the tropes and stereotypical narratives embedded into colonial Indigenous settler relations in the context of food If this was accepted by all Australians it would allow opportunities to be created for Indigenous Australians to develop food products for the market that are sustainable economically viable and

The Empire of Climate David N. Livingstone,2024-04-16 How the specter of climate has been used to explain history since antiquity Scientists journalists and politicians increasingly tell us that human impacts on climate constitute the single greatest threat facing our planet and may even bring about the extinction of our species Yet behind these anxieties lies an older much deeper fear about the power that climate exerts over us The Empire of Climate traces the history of this idea and its pervasive influence over how we interpret world events and make sense of the human condition from the rise and fall of ancient civilizations to the afflictions of the modern psyche Taking readers from the time of Hippocrates to the unfolding crisis of global warming today David Livingstone reveals how climate has been critically implicated in the politics of imperial control and race relations been used to explain industrial development market performance and economic breakdown and served as a bellwether for national character and cultural collapse He examines how climate has been put forward as an explanation for warfare and civil conflict and how it has been identified as a critical factor in bodily disorders and acute psychosis A panoramic work of scholarship The Empire of Climate maps the tangled histories of an idea that has haunted our collective imagination for centuries shedding critical light on the notion that everything from the wealth of nations to the human mind itself is subject to climate s imperial rule
