An Assessment Of Natural Hazards And Disasters In Canada:

An Assessment of Natural Hazards and Disasters in Canada David Etkin, C.E. Haque, Gregory R. Brooks, 2003-04-30 The problems and issues of natural hazards and disasters both globally and in Canada are becoming increasingly important since the costs of extreme natural events have been escalating and significant vulnerabilities exist in Canadian society Without thoughtful and effective mitigation these costs and human suffering are likely to continue to increase An assessment of knowledge research and practice in risk hazards and disasters fields is a fundamental step towards the goal of prevention and mitigation This book on natural hazards and disasters in Canada is the first comprehensive interdisciplinary publication on this subject and is the result of a national assessment on this topic A variety of papers from the physical and social sciences explores both the risks associated with these hazards and adaptive strategies that can be used to reduce those risks Audience This excellent collection of papers is intended for academics professionals and practitioners involved in hazard reduction activities who wish to obtain a better understanding of Canadian natural hazards

Disaster Risk and Vulnerability C. Emdad Haque, David Etkin, 2012-04-11 From the Asian tsunami of 2004 to hurricane Katrina in 2005 and the Tohoku earthquake of 2011 our century has been fraught with catastrophic natural disasters Disaster Risk and Vulnerability assesses the human toll and economic losses of natural disasters and reasserts the importance of human collaboration and

organization in disaster management In most cases policy makers planners managers and regulators who implement disaster risk reduction response planning and management strategies remain detached from local conditions failing to address them effectively Presenting case studies from Asia and North America as well as a broad range of approaches to community mobilization and partnership development contributors show that local communities all levels of government and non governmental organizations must work collectively in order to reduce the harm caused by disasters Despite unprecedented progress in science and technology and governments continued efforts in disaster risk reduction socioeconomic losses due to environmental disasters continue to rise Disaster Risk and Vulnerability provides knowledge and information that will benefit anyone working in the fields of environment disasters and community mobilization in an effort to reverse this trend

Geospatial Techniques in Urban Hazard and Disaster Analysis Pamela S. Showalter, Yongmei Lu, 2009-11-11 This book is the second in a series that examines how geographic information technologies (GIT) are being implemented to improve our understanding of a variety of hazard and disaster situations The main types of technologies covered under the umbrella of GIT as used in this volume are geographic information systems remote sensing not including ground penetrating or underwater systems and global positioning systems Our focus is on urban areas broadly defined in order to encompass rapidly growing and densely populated areas that may not be considered urban in the conventional sense The material presented here is also unabashedly applied our goal is to provide GIT tools to those seeking more efficient ways to respond to recover from mitigate prevent and or model hazard and disaster events in urban settings Therefore this book was created not only with our colleagues in the academic world in mind but also for hazards professionals and practitioners We also believe graduate students will find the material presented here of interest as may upper division undergraduate students

Natural Disasters and Risk Management in Canada Nirupama Agrawal, 2018-03-27 These chapters provide valuable and comprehensive information on a variety of hazards including both scientific and social aspects of disasters The work introduces the concept of large medium and small scale hazards and includes many useful case studies as well as working examples of theoretical concepts As readers will acknowledge today the distinction between natural and technological hazards is becoming blurred and a new concept of NATECH hazards is evolving For permanent hazards such as tides wind waves coastal erosion and climate change routine predictions are made whereas for evanescent hazards including droughts sea level rise and coastal subsidence monitoring of various parameters is the norm Only for episodic hazards for example hurricanes winter storms tsunamis and river floods early warning systems are used with varying degrees of success The book explores how for certain episodic hazards like tornadoes landslides forest fires snow avalanches and volcanic eruptions the early warning systems are still in various stages of development Readers will gain knowledge of theoretical and practical concepts of risk evaluation which assist in better understanding of disaster

dynamics and readers will become better equipped in quantification of disaster risk and vulnerability The author explains how risk reduction initiatives taking into account stakeholders participation and perception can provide a roadmap to building resilient communities and cities This book will be useful not only to practitioners of disaster management but also to research scholars and graduate students It is highly readable and will appeal more broadly too to all those who are interested in the very latest thinking on and expert analysis of hazards and disasters *Geological Survey of Canada, Open File 6552 ,*
