Wealth Accumulation and Entrepreneurship in the Ottoman Empire, 18th to 20th Centuries Maria Christina Chatziioannou, Sophia Laiou, 2024-12-23 This book provides a significant contribution to our understanding of the Ottoman Empire's economic history particularly through its exploration of local entrepreneurship which brings new perspectives to the economic dynamics of the region This focus adds a valuable dimension to the broader narrative of Mediterranean social and economic developments from the 18th to the 20th century By emphasizing the role of both Muslim and non Muslim agents the work challenges more Eurocentric narratives that have often influenced the historiography of economic activities

in this region The inclusion of Ottoman Turkish and Greek sources underlines the importance of accessing voices and records that have been underutilized in previous studies The fact that this project is a result of Greek Turkish academic cooperation is particularly noteworthy as it promotes a more nuanced and comprehensive view toward shared histories in order to shed light on complex historical phenomena This work will be of interest to scholars of Ottoman and Mediterranean history seeking to explore the nuances of economic and social change from within the Ottoman Empire It will also appeal to a wider audience interested in the history of early entrepreneurial activities and the complex interplay between cultural and economic dynamics in historical contexts

Legal and Political Thinking Against Sovereignty Hugo

Canihac,2025-09-17 At the intersection of the history of constitutional ideas and of political theory this book offers a new genealogy of the constitutional thought of the European Union Centrally the book traces the emergence and transformation of the post sovereign thesis an argument that seeks to move beyond the routine opposition between states and European organization by claiming the concept of sovereignty to be obsolete and its complicated relationship with liberalism Analyzing the thought of a series of constitutional thinkers who have developed different versions of this thesis in relation to European integration the book shows that far from being new as is generally assumed the post sovereign thesis goes back to the late nineteenth century Exploring the interplay of these thinkers critical conceptualizations of sovereignty and of their views on liberalism the book argues that although they shared a concern for the transformation of a world seen as increasingly interdependent they imagined deeply different versions of post sovereignty Bringing this history into focus the book offers a rich new perspective on contemporary debates about the EU and the possibilities of global constitutionalism This book will appeal to scholars and students working in the fields of EU and constitutional law legal history and the history of political thought as well as others with relevant interests working in political science

The Great Brexit Swindle T. J.

Coles,2016-12-02 In his urgent new book T J Coles uncovers the forces seeking to uncouple Britain from the European Union Allied to an expanding core of free market fanatics in the Conservative party is a powerful group of globalists and financial traders Their political ideology is neoliberalism a worldwide agenda that seeks to deregulate markets and maximize profits for global elites at the expense of working people The effect is a growing gap internationally between rich and poor Digging deep into the funding campaign The Great Brexit Swindle documents the potent self serving interests behind Brexit In the wake of the financial crisis of 2008 mega rich hedge fund managers and billionaire CEOs are keen to be rid of Brussels and its red tape regulation Their anti European political allies meanwhile are preparing to corner markets in Asia and South America whilst expanding Britain s military capacity as a back up to economic penetration Brexit was sold to the public as a once in a lifetime opportunity to regain sovereignty control immigration and increase the nation s wealth But despite the manifold promises of Brexiteers Coles demonstrates that economic globalization will lead to growing job insecurity and greater immigration once British workers are put in direct competition with the huge poor populations of countries like Brazil

China Mexico and India Increasing free market trade worldwide leaves Britain open to low quality products such as hormone treated American beef and genetically modified foods whilst the new planned trade agreements would only accelerate the privatization of public services Although Coles is not an advocate for the EU he argues that the Brexit agenda is designed only to serve the interests of the wealthy and increasingly powerful 0 1% of the population
