BATTERY OPERATION

Unclip the Battery Door (8) and insert 2x1.5V (R6S) batteries or equivalent (not supplied) observing correct polarities. For prolonged battery life, we recommend the use of LRI6 alkaline batteries.

EXTERNAL DC SOCKET

As an alternative to batteries, the unit can be operated from an external DC supply, via a suitable 3 volt adaptor. (adaptor not supplied). Connect the centre negative adaptor to the External DC Socket (10). When using an adaptor the batteries are automatically disconnected, however batteries must be removed if not being used for a prolonged period of time, or if the unit is to be continuously operated from an adaptor.

PLAYING A CASSETTE TAPE

1. Open the Cassette Door (1) and insert the cassette with the tape uppermost.
2. Adjust the headphones for your comfort and insert the plug into the Headphone Socket (6).
3. Press the Play Key (4) and adjust the Volume Control (7) for your desired listening level.

FAST WINDING

The tape can be rapidly wound from one spool to another by pressing the Fast Forward Key (3). The Stop Key (2) must be used between fast winding and playback operations in order to prevent damage to the cassette tape.

BASS BOOST

The Bass Boost Selector (5) can be used to enhance the effect of lower frequencies it is not recommended that Bass Boost is selected when listening at high volume levels as this will cause distortion.

PRECAUTIONS

Common causes of trouble are:
a) Tapes jamming leading to uneven speed on playback, and
b) Tapes tangling where the tape wraps itself around vital parts of the mechanism. To reduce the likelihood of these problems occurring you MUST observe the following precautions:
Check that there are no loose layers of tape visible through the cassette centre window (see Fig. 2). Take up these loose layers using a pencil or ballpoint pen before inserting the cassette into the machine (see Fig. 3).

Fig. 2

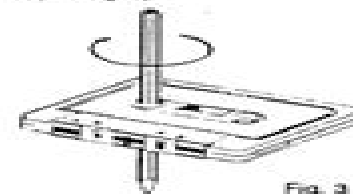

Fig. 3

If the cassette feels 'tight' whilst performing the operation shown above, the tape may be jamming due to 'ridges' in the winding of the tape (visible through the centre window). These may be removed in most cases by fast winding of the cassette from one end to the other.
Use only well-known brands of tape.
Avoid use of C120 cassettes.

BATTERY CARE

1. Check correct fitting of batteries, observing correct polarities.
2. Always replace a whole set of batteries at a time. Do not mix old and new batteries.
3. Remove dead batteries from equipment and all batteries when not using for a prolonged period of time.
4. Never dispose of batteries in fire, as this can cause them to explode.
5. Never attempt to recharge ordinary batteries.
6. Children should be supervised if changing batteries.
