Run to Failure Abrahm Lustgarten, 2012-03-19 It was Big Oil's nightmare moment and the dominoes began falling years before the well was drilled. Two decades ago British Petroleum, a venerable and storied corporation, was running out of oil reserves. Along came a new CEO of vision and vast ambition, John Browne, who pulled off one of the greatest corporate turnarounds in history. BP bought one company after another and then relentlessly fired employees and cut costs. It skipped safety procedures, pumped toxic chemicals back into the ground, and let equipment languish even while Browne claimed a new era of environmentally sustainable business as his own. For a while the strategy worked, making BP one of the most profitable corporations in the world. Then it all began to unravel in felony convictions for environmental crimes and in one deadly accident after another. Employees and regulators warned that BP's problems, unfixed, were spinning out of control that another disaster, bigger and deadlier, was inevitable. Nobody was listening. Having reported on business and the energy industry for nearly a decade, Abrahm Lustgarten uses interviews with key executives, former government investigators, and whistle blowers along with his exclusive access to BP's internal documents and emails to weave a spellbinding investigative narrative of hubris and greed well before the Gulf oil spill. **Bloomsbury's Manual of the Insolvency and Bankruptcy Code, 2016 with Rules and Regulations, 9e** Bloomsbury Professional India, 2022-01-31 This is a comprehensively updated source of the Code, Rules, and Regulations with notifications, circulars, and guidelines on the code at one place. Over the past eight editions, this manual has built up a reputation of accuracy and authenticity and is often preferred by lawyers for this reason. Highlights: The manual covers the Code and delegated legislation. The footnotes contain legislative history for tracing the Code as it was at a point of time in the past. *Powers' Central Station Directory and Buyers' Manual*, 1900

what to tell the patient *Molecular Diagnostic PCR Handbook* Gerrit J. Viljoen, Louis H. Nel, John R. Crowther, 2005-12-06

PREFACE The Joint FAO IAEA Division of Nuclear Techniques in Food and Agriculture is involved in agricultural research and development and assists Member States of FAO and IAEA in improving strategies to ensure food security through the use of nuclear techniques and related biotechnologies where such techniques have a valuable and often unique role. In particular, molecular diagnostic methods have rapidly evolved in the past twenty years since the advent of the Polymerase Chain Reaction (PCR). They are used in a wide range of agricultural areas such as improving soil and water management, producing better crop varieties, diagnosing plant and animal diseases, controlling insect pests and improving food quality and safety. The uses of nucleic acid directed methods have increased significantly in the past five years and have made important contributions to disease control country programmes for improving national and international trade. These developments include the more routine use of PCR as a diagnostic tool in veterinary diagnostic laboratories. However, there are many problems associated with the transfer and particularly the application of this technology. These include lack of consideration of the establishment of quality assured procedures, the required set up of the laboratory and the proper training of staff. This can lead to a situation where results are not assured. This book gives a comprehensive account of the practical aspects of PCR and strong consideration is given to ensure its optimal use in a laboratory environment. This includes the setting up of a PCR laboratory, Good Laboratory Practice and standardised PCR protocols. **Directives, publications, reports index** United States. Coast Guard, 1982
