the Digital Age Marilee Sprenger, 2010-03-15 Smartphones videogames webcasts wikis blogs texting emoticons What does the rapidly changing digital landscape mean for classroom teaching How has technology affected the brain development of students How does it relate to what we know about learning styles memory and multiple intelligences How can teachers close the digital divide that separates many of them from their students In *Brain Based Teaching in the Digital Age* Marilee Sprenger answers these and other questions with research based information and practical advice gained from her years as a classroom teacher and a consultant on brain based teaching As she puts it It s time to meet the digital brain We need to use the technology tools learn the digital dialogue and understand and relate better to our students At the same time she emphasizes the importance of educating the whole child by including exercise music and art in the classroom and helping students develop their social emotional intelligence Creativity empathy and the ability to synthesize material are 21st century skills that can t be ignored in the digital age Readers will find easy to understand information about the digital brain and how it works high tech and low tech strategies for everyday teaching and learning and inspiration for creating classroom environments that will entice and encourage students at all grade levels With this book as a guide educators can move confidently across the digital divide to a world of new possibilities for themselves and their students **Mind, Brain, and Education Science**

Tracey Tokuhama-Espinoza, 2010-12-20 Establishing the parameters and goals of the new field of mind brain and education science A groundbreaking work *Mind Brain and Education Science* explains the new transdisciplinary academic field that has grown out of the intersection of neuroscience education and psychology The trend in brain based teaching has been growing for the past twenty years and has exploded in the past five to become the most authoritative pedagogy for best learning results Aimed at teachers teacher trainers and policy makers and anyone interested in the future of education in America and beyond *Mind Brain and Education Science* responds to the clamor for help in identifying what information could and should apply in classrooms with confidence and what information is simply commercial hype Combining an exhaustive review of the literature as well as interviews with over twenty thought leaders in the field from six different countries this book describes the birth and future of this new and groundbreaking discipline *Mind Brain and Education Science* looks at the foundations standards and history of the field outlining the ways that new information should be judged Well established information is elegantly separated from neuromyths to help teachers split the wheat from the chaff in classroom planning instruction and teaching methodology **Teacher-Student Relationships**

Ernest J. Zarra III, 2013-04-08 Why are so many public school teachers administrators and coaches choosing to become romantically and sexually involved with teenage students and players Since 2000 numbers of intimate relationships between teachers and students have skyrocketed Teacher arrests are at all time highs Is there a correlation between these relationships and communication and social technologies The book explores What is driving those in public and private education to have romantic and sexual relationships with their students and to jeopardize their careers families reputations and freedom What

roles do communication and social technologies play in feeding teacher student relationships Who is protecting teenagers from predator teachers and predator coaches in our schools Is there a new phenomenon in schools The Predator Teenage Student What practical strategies can be put in place to protect teenagers from sexual predators on our campuses The appropriate educational use of communication technologies on high school campuses This book is provocative and relevant for educators at all levels public and private It is also a must read for professors teachers in training athletic and academic coaches school administrators and parents *Upgrade Your Teaching* Jay McTighe, Judy Willis, 2019-04-16 How can educators leverage neuroscience research about how the human brain learns How can we use this information to improve curriculum instruction and assessment so our students achieve deep learning and understanding in all subject areas *Upgrade Your Teaching Understanding by Design Meets Neuroscience* answers these questions by merging insights from neuroscience with Understanding by Design UbD the framework used by thousands of educators to craft units of instruction and authentic assessments that emphasize understanding rather than recall Readers will learn How the brain processes incoming information and determines what is or is not retained as long term memory How brain science reveals factors that influence student motivation and willingness to put forth effort How to fully engage all students through relevance and achievable challenge How key components of UbD including backward design essential questions and transfer tasks are supported by research in neuroscience Why specific kinds of teaching and assessment strategies are effective in helping students gain the knowledge skills and deep understanding they need to succeed in school and beyond and How to create a brain friendly classroom climate that supports lasting learning Authors Jay McTighe and Judy Willis translate research findings into practical information for everyday use in schools at all grade levels and in all subject areas With their guidance educators at all levels can learn how to design and implement units that empower teachers and students alike to capitalize on the brain s tremendous capacity for learning **Teaching with Poverty in Mind** Eric Jensen, 2010-06-16 In *Teaching with Poverty in Mind* What Being Poor Does to Kids Brains and What Schools Can Do About It veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children families and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain the brain s very ability to adapt from experience means that poor children can also experience emotional social and academic success A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich balanced learning environments and caring relationships that build students resilience self esteem and character Drawing from research experience and real school success stories *Teaching with Poverty in Mind* reveals What poverty is and how it affects students in school What drives change both at the macro level within schools and districts and at the micro level inside a student s brain Effective strategies from those who have succeeded and ways to replicate those best practices at your own school and

How to engage the resources necessary to make change happen Too often we talk about change while maintaining a culture of excuses We can do better Although no magic bullet can offset the grave challenges faced daily by disadvantaged children this timely resource shines a spotlight on what matters most providing an inspiring and practical guide for enriching the minds and lives of all your students The Motivated Brain Gayle Gregory, Martha Kaufeldt, 2015-09-17 This book explores an approach to teaching and learning that improves student motivation knowledge acquisition retention and academic success **Brain Gains** David P. Sortino, 2020-09-29 Brain Gains So You Want to Be Your Child's Learning Coach represents the final link to the first two books of the Brain Smart Trilogy This third book recognizes the learning challenges children face each day in learning environments defined by mandated curriculums mandated testing and shortened school years For example from kindergarten through high school your child will be responsible for assimilating and accommodating different school curriculums regardless that these mandated curriculums often do not take into account the many cognitive and emotional levels of each student That is problems can develop for those children who are not academically at the curriculum's grade level due to multiple challenges and distractions such as adapting to the peer group family dynamics or disharmony divorce child abuse etc delayed physiological social development and cognitive delays that could cause a life time of learning difficulties Finally a major strength of this book is that it offers parents and teachers the opportunity to incorporate learning techniques used by myself and other successful learning coaches and learning specialists that readers can employ for specific student learning challenges Most importantly parents and teachers will not only have hands on learning techniques but their students and or child will receive knowledge catered to their learning needs they can employ for future learning challenges
