A Cultural History of Shopping in the Age of Enlightenment Ilja Van Damme, 2022-06-02 A Cultural History of Shopping was a Library Journal Best in Reference selection for 2022 The consumer revolution of the 18th century has been the subject of much debate among historians but it seems clear there was also a retail revolution a period of unprecedented growth in material goods was accompanied by a proliferation of retail spaces and techniques which brought new fashions and imported commodities to the homes of consumers Governments responded to a growing culture of polite and civilized behavior across society by stimulating urban renewal for leisure and shopping new pavements street lighting green promenades theatres coffee houses and adjacent shopping streets were laid out everywhere in Europe As the 18th century drew to its close shopping had become a publicly accepted and celebrated leisure pursuit gaining its proper meaning in multiple languages A Cultural History of Shopping in the Age of Enlightenment presents an overview of the period with themes addressing practices and processes spaces and places shoppers and identities luxury and everyday home and family visual and literary representations reputation trust and credit and governance regulation and the state

A Cultural History of Shopping in the Modern Age Vicki Howard, 2022-06-02 A Cultural History of Shopping was a Library Journal Best in Reference selection for 2022 In the modern consumer age that emerged after the First World War shopping became a ubiquitous cultural practice Despite its apparent universality the historicity and contingency of shopping should not be ignored its meaning was always inextricably linked to the political material and economic contexts within which it took place Gendered female for the most part shopping continued to evoke different cultural responses embraced as liberatory by some condemned as frivolous by others Business decisions and public policies helped construct the frameworks within which new often American led shopping cultures emerged from downtown department stores to chain stores to suburban shopping malls The digital revolution in shopping that began in the last decade of the 20th century has changed the face of cities and towns and led to the closure of many bricks and mortar stores but as this volume explores the shopper remains very much at the center of Western capitalist societies A Cultural History of Shopping in the Modern Age presents an overview of the period with themes addressing practices and processes spaces and places shoppers and identities luxury and everyday home and family visual and literary representations reputation trust and credit and governance regulation and the state

A Cultural History of Race in the Renaissance and Early Modern Age Kimberly Ann Coles, Dorothy Kim, 2023-06-01 The past is always an interpretive act from the lens of the present Through the lens of critical race theory the essays collected here explore new analytical models theoretical frameworks and methodological approaches in attempting to reimagine the European Renaissance and early modern periods in terms of global expansion awareness and participation Centering race in these periods requires that we acknowledge the people against whom social hierarchies and differential treatment were directed This collection takes Europe as its focus but White Europeans are not centred in it and the experiences of Black

Africans Asians Jews and Muslims are not relegated to the margins of a shared history Situating Europe within a global context forces the reconsideration of the violence that attends the interaction of peoples both across cultures and enmeshed within them The less we are attentive to the cultural interactions cross cultural migrations and global dimensions of the late medieval and early modern periods the less we are forced to recognize the violence intolerance power struggles and enforced suppressions that attend them

Sex in an Old Regime City Julie Hardwick, 2020-07-18 *Sex in an Old Regime City* is a major reframing of the long history of young people's intimacy It shows how long running problems like out of wedlock pregnancy were handled very differently in Old Regime France than in more recent centuries Abortion infanticide broken hearts and conflict with parents and neighbors were key challenges of young people's lives then as now but young couples' efforts to deal with these challenges were supported in pragmatic often sympathetic ways by their communities and institutions like local courts clergy legal officials and social welfare managers

A Cultural History of Comedy in the Age of Enlightenment Elizabeth Kraft, 2021-12-30 This volume highlights the variety of forms comedy took in England with reference to developments in Europe particularly France during the European Enlightenment It argues that comedy in this period is characterized by wit satire and humor provoking both laughter and sympathetic tears Comic expression in the Enlightenment reflects continuities and engagements with the comedy of previous eras it is also noted for new forms and preoccupations engendered by the cultural philosophical and political concerns of the time including democratizing revolutions increasing secularization and growing emphasis on individualism Discussions emphasize the period's stage comedy and acknowledge comic expression in various forms of print media including the emerging literary form we now know as the novel Contributions from scholars reflect a wide variety of interests in the field of 18th century studies and the inclusion of a generous number of illustrations throughout demonstrates that the period's visual culture was also an important part of the Enlightenment comic landscape Each chapter takes a different theme as its focus form theory praxis identities the body politics and power laughter and ethics These eight different approaches to Enlightenment comedy add up to an extensive synoptic coverage of the subject

has been created traded used and interpreted over the last 5000 years The themes covered in each volume are color philosophy and science color technology and trade power and identity religion and ritual body and clothing language and psychology literature and the performing arts art architecture and interiors and artefacts Amy Bueno is Assistant Professor at the Wilkinson College of Arts Humanities and Social Sciences at Chapman University USA Sven Dupr is Professor of History of Art Science and Technology at Utrecht University and the University of Amsterdam The Netherlands Volume 3 in the Cultural History of Color set General Editors Carole P Biggam and Kirsten Wolf New Directions in Social and Cultural History Sasha Handley,Rohan McWilliam,Lucy Noakes,2018-02-22 What does it mean to be a social and cultural historian today In the wake of the cultural turn and in an age of digital and public history what challenges and opportunities await historians in the early 21st century In this exciting new text leading historians reflect on key developments in their fields and argue for a range of new directions in social and cultural history Focusing on emerging areas of historical research such as the history of the emotions and environmental history New Directions in Social and Cultural History is an invaluable guide to the current and future state of the field The book is divided into three clear sections each with an editorial introduction and covering key thematic areas histories of the human the material world and challenges and provocations Each chapter in the collection provides an introduction to the key and recent developments in its specialist field with their authors then moving on to argue for what they see as particularly important shifts and interventions in the theory and methodology and suggest future developments New Directions in Social and Cultural History provides a comprehensive and insightful overview of this burgeoning field which will be important reading for all students and scholars of social and cultural history and historiography A Cultural History of Genocide in the Middle Ages Melodie H. Eichbauer,2023-05-04 The period covered by this volume roughly 800 1400 considers genocidal massacres and actions within the context of the pre modern state a time when the term genocide did not yet exist In considering rhetoric discrimination and political and legal marginalization that impacted the lives of particular peoples the volume takes as its premise that genocidal practices and massacres can occur when social dynamism and political change challenges the identity of a community The case studies analysed in the individual chapters implicitly or explicitly draw upon the frameworks of comparative genocide scholars to explore genocidal massacres in the Middle Ages as localized phenomenon even if these isolated outbursts do not graph onto the modern definition of genocide perfectly Each contribution considers genocide as caused by settling national religious and ethnic differences genocide as designed to enforce or fulfil an ideology and genocide as designed to colonize Collectively the essays move beyond the number of people killed to consider the steps taken against a people to erase them from the social and cultural fabric of society It is hoped that this volume encourages us to think both about the legal structures of genocide but also about how the term can be more inclusive and expansive *Debating New Approaches to History* Marek Tamm,Peter Burke,2018-10-04 With its innovative format Debating New Approaches to History addresses issues currently at the top of

the discipline's theoretical and methodological agenda. In its chapters leading historians of both older and younger generations from across the Western world and beyond discuss and debate the main problems and challenges that historians are facing today. Each chapter is followed by a critical commentary from another key scholar in the field and the author's response. The volume looks at topics such as the importance and consequences of the digital turn in history; what will history writing be like in a digital age; the challenge of posthumanist theory for history writing; how do we write the history of non-humans and the possibilities of moving beyond traditional sources in history and establishing a dialogue with genetics and neurosciences; what are the perspectives and limits of the so-called neurohistory. It also revisits older debates in history which remain crucial such as what the gender approach can offer to historical research or how to write history on a global scale. *Debating New Approaches to History* does not just provide a useful overview of the new approaches to history it covers but also offers insights into current historical debates and the process of historical method in the making. It demonstrates how the discipline of history has responded to challenges in society such as digitalization, globalization and environmental concerns as well as in humanities and social sciences such as the material turn, visual turn or affective turn. This is a key volume for all students of historiography wanting to keep their finger on the pulse of contemporary thinking in historical research.
