Indian Blood Andrew Jolivette, 2016 Finalist for the 2017 Lambda Literary Lammy Award in LGBTQ Studies The first book to examine the correlation between mixed race identity and HIV AIDS among Native American gay men and transgendered people Indian Blood provides an analysis of the emerging and often contested LGBTQ two spirit identification as it relates to public health and mixed race identity Prior to contact with European settlers most Native American tribes held their two spirit members in

high esteem even considering them spiritually advanced However after contact and religious conversion attitudes changed and social and cultural support networks were ruptured This discrimination led to a breakdown in traditional values beliefs and practices which in turn pushed many two spirit members to participate in high risk behaviors The result is a disproportionate number of two spirit members who currently test positive for HIV Using surveys focus groups and community discussions to examine the experiences of HIV positive members of San Francisco s two spirit community Indian Blood provides an innovative approach to understanding how colonization continues to affect American Indian communities and opens a series of crucial dialogues in the fields of Native American studies public health queer studies and critical mixed race studies
