Elise van Nederveen Meerkerk

Amsterdam Omstreeks 1900:

Images of Dutchness Sarah Dellmann, 2025-10-01 Why do early films present the Netherlands as a country full of canals and windmills where people wear traditional costumes and wooden shoes while industries and modern urban life are all but absent *Images of Dutchness* investigates the roots of this visual repertoire from diverse sources ranging from magazines to tourist brochures from anthropological treatises to advertising trade cards stereoscopic photographs picture postcards magic lantern slide sets and films of early cinema This richly illustrated book provides an in depth study of the fascinating corpus of popular visual media and their written comments that are studied for the first time Through the combined analysis of words and images the author identifies not only what has been considered typically Dutch in the long nineteenth century but also provides new insights into the logic and emergence of national clichés in the Western world [A Metropolitan History of the Dutch Empire](#)

Matthijs Kuipers, 2025-10-01 [A Metropolitan History of the Dutch Empire](#) Popular Imperialism in The Netherlands 1850 1940 examines popular imperial culture in the Netherlands around the turn of the twentieth century In various and sometimes unexpected places in civil society the empire played a prominent role and was key in mobilizing people for causes that were directly and indirectly related to the Dutch overseas colonies At the same time however the empire was ostensibly absent from people's minds Except for some jingoist outbursts during the Aceh War and the Boer War indifference was the main attitude with which imperial affairs were greeted How could the empire simultaneously be present and absent in metropolitan life Drawing upon the works of scholars from fields ranging from postcolonial studies to Habsburg imperialism the author argues that indifference to empire was not an anomaly to the idea of an all permeating imperial culture but rather the logical consequence of an imperial ideology that rendered metropole and colony firmly separated entities The different groups and individuals that advocated imperial or anti imperial causes such as missionaries former colonials Indonesian students and boy scouts hardly ever related to each other explicitly and had their own distinctive modes of expression but were nonetheless part of what the author calls a fragmented empire and shared the common thread of Dutch imperial ideology This suggests we should not mistake colonial culture's metropolitan invisibility for a lack of strength

Dutch Enterprise in the 20th Century Keetie E. Sluyterman, 2013-07-04 This is the first book to summarise the twentieth century economic history of the Netherlands from a business history perspective It has a broad historical coverage of Dutch business development including in particular the major multinationals such as Philips Shell and Unilever Although focused on Dutch business it has a strong international flavour **Denial: The Final Stage of Genocide?** John Cox, Amal

Khoury, Sarah Minslow, 2021-09-21 Genocide denial not only abuses history and insults the victims but paves the way for future atrocities Yet few if any books have offered a comparative overview and analysis of this problem *Denial The Final Stage of Genocide* is a resource for understanding and countering denial *Denial* spans a broad geographic and thematic range in its explorations of varied forms of denial which is embedded in each stage of genocide Ranging far beyond the most

well known cases of denial this book offers original pathbreaking arguments and contributions regarding competition over commemoration and public memory in Ukraine and elsewhere transitional justice in post conflict societies global violence against transgender people which genocide scholars have not adequately confronted music as a means to recapture history and combat denial public education s role in erasing Indigenous history and promoting settler colonial ideology in the United States triumphalism as a new variant of denial following the Bosnian Genocide denial vis vis Rwanda and neighboring Congo DRC With contributions from leading genocide experts as well as emerging scholars this book will be of interest to scholars and students of history genocide studies anthropology political science international law gender studies and human rights

The Practice of Philology in the Nineteenth-Century Netherlands Ton Kalmthout, Huib Zuidervaart, 2025-10-01 The Netherlands have a long and important tradition in scholarly philology For instance in the early days of Leiden University philology or the critical examination of classical texts was regarded as a cutting edge science This field of scholarship had far reaching implications on disciplines such as theology chronology astronomy history law and other demarcated bodies of knowledge identified as a separate science Regardless of the exact field of inquiry philologists as protectors and teachers of the written heritage always played a pivotal role in the formation of the cultural repertoire of the educated public As men of learning and high esteem philologists also exerted influence outside the cultural sphere especially in politics and religion The ever changing composition of the philological frame of reference made no difference in this respect But in the nineteenth century the practice of philology was passing a crucial phase of change In both its object of study and in its methods several fundamental modifications occurred Texts in the vernacular and national philologies attracted more and more attention of the public and neo philology succeeded in taking over the central position traditionally occupied by classical philology Subfields such as linguistics edition technique and history grew into new more or less independent sub disciplines whereas scientific methods such as stemmatology and comparative approaches were introduced in the humanities This redesigned the landscape of philology radically New boundaries became apparent and existing ones were questioned or drawn sharper At the time philology underwent an accelerated process of differentiation and professionalization Philology demarcated its own more or less independent sphere with a specific authority The establishment of a branch of national philology can be regarded as an example of discipline formation in the humanities This fascinating process of change and the search for new boundaries in Dutch philology is highlighted in this book

The Practice of Philology in the Netherlands in the Nineteenth Century the first book on this topic in the English language

Schooling and the Making of Citizens in the Long Nineteenth Century Daniel Tröhler, Thomas S. Popkewitz, David F. Labaree, 2011-05-09 This book is a comparative history that explores the social cultural and political formation of the modern nation through the construction of public schooling It asks how modern school systems arose in a variety of different republics and non republics across four continents during the period from the late eighteenth century to the early twentieth century The authors begin with the republican preoccupation

with civic virtue the need to overcome self interest in order to take up the common interest which requires a form of education that can produce individuals who are capable of self guided rational action for the public good They then ask how these educational preoccupations led to the emergence of modern school systems in a disparate array of national contexts even those that were not republican By examining historical changes in republicanism across time and space the authors explore central epistemologies that connect the modern individual to community and citizenship through the medium of schooling Ideas of the individual were reformulated in the nineteenth century in reaction to new ideas about justice social order and progress and the organization and pedagogy of the school turned these changes into a way to transform the self into the citizen

Women, Work and Colonialism in the Netherlands and Java Elise van Nederveen Meerkerk, 2019-05-07
This book makes an important contribution to the history of household labour relations in two contrasting societies It deserves a wide readership Anne Booth SOAS University of London UK By exploring how colonialism affected women s work in the Dutch Empire this carefully researched book urges us to rethink the momentous implications of colonial exploitation on gender roles both in periphery and metropolis Ulbe Bosma the Free University of Amsterdam the Netherlands In this exciting and original book Elise van Nederveen Meerkerk exposes how colonial connections helped determine the status and position of women in both the Netherlands and Java The effects of these connections continue to shape women s lives in both colony and metropole today Jane Humphries University of Oxford UK Recent postcolonial studies have stressed the importance of the mutual influences of colonialism on both colony and metropole This book studies such colonial entanglements and their effects by focusing on developments in household labour in the Dutch Empire in the period 1830 1940 The changing role of households and particularly women s economic activities in the Netherlands and Java one of the most important Dutch colonies forms an excellent case study to help understand the connections and disparities between colony and metropole The author contends that colonial entanglements certainly existed and influenced developments in women s economic role to an extent both in Java and the Netherlands However during the nineteenth century more and more distinctions in the visions and policies towards Dutch working class and Javanese peasant households emerged Accordingly a more sophisticated framework is needed to explain how and why such connections were both intentionally and unintentionally severed over time

Boundaries and their Meanings in the History of the Netherlands, 2009-06-17
Traditionally the term boundary applies to the demarcation between a physical place and another physical place most commonly associated with lines on a map As the essays in this volume demonstrate however a boundary can also function in a more broadly conceptual manner A boundary becomes not an imaginary line but a tool for thinking about how to separate any two elements whether ideas events etc into categories by which they become comprehensible and distinct The scholar contributors seek not simply to discern the boundaries but and perhaps more importantly to understand the process of delination and its consequences With its maverick history and grass root political traditions the Netherlands provides an

auspicious setting to examine the historical function of boundaries both real and imagined *Educational Secularization within Europe and Beyond* Mette Buchardt, 2024-11-04 Did religion disappear with modernization and the secularization reforms that changed the relation between religion and state throughout the European empires and nation states from late nineteenth century onwards Or was religion rather transformed becoming a part of the new social and national imaginaries on the road from European empires to African Middle Eastern European Union and Post Soviet nation states What are the historical roots behind the divisions of state church and education that characterized the late nineteenth and during the twentieth century What has been the role of education in this context both with regard to political reforms targeting the education systems and with regard to broader public enlightenment efforts and modernization of the state Connecting scholars across the fields of history and historical sociology of education church history and historical religion research and political history and covering the time span from the early modern period and up until the present this volume explores how education reform has functioned as an arena for the political project of secularization and in which way this contributed to transforming and revitalizing religion **The Cambridge History of Nationhood and Nationalism: Volume 2, Nationalism's Fields of Interaction** Cathie Carmichael, Matthew D'Auria, Aviel Roshwald, 2023-11-09 This major new reference work with contributions from an international team of scholars provides a comprehensive account of ideas and practices of nationhood and nationalism from antiquity to the present It considers both continuities and discontinuities engaging critically and analytically with the scholarly literature in the field In volume II leading scholars in their fields explore the dynamics of nationhood and nationalism s interactions with a wide variety of cultural practices and social institutions in addition to the phenomenon s crucial political dimensions The relationships between imperialism and nationhood nationalism and between major world religions and ethno national identities are among the key themes explained and explored The wide range of case studies from around the world brings a truly global comparative perspective to a field whose study was long constrained by Eurocentric assumptions
