An Introduction To Sustainability Martin Mulligan:

An Introduction to Sustainability Martin Mulligan, 2014-11-20 *An Introduction to Sustainability* provides students with a comprehensive overview of the key concepts and ideas which are encompassed within the growing field of sustainability. The book teases out the diverse but intersecting domains of sustainability and emphasises strategies for action. Aimed at those studying the subject for the first time, it is unique in giving students from different disciplinary backgrounds a coherent framework and set of core principles for applying broad sustainability principles within their personal and professional lives. These include working to improve equality within and across generations, moving from consumerism to quality of life goals and respecting diversity in both nature and culture. Areas of emerging importance such as the economics of happiness and wellbeing stand alongside core topics including Energy and society, Consumption and consumerism, Risk and resilience, Waste, water and land. Key challenges and applications are explored through international case studies, and each chapter includes a thematic essay drawing on diverse literature to provide an integrated introduction to fundamental issues. Launched with the brand new Routledge Sustainability Hub, the book's companion website contains a range of features to engage students with the interdisciplinary nature of Sustainability. Together, these resources provide a wealth of material for learning, teaching and researching the topic of sustainability. This textbook is an essential companion to any sustainability course.

Concepts of Urban-Environmental History Sebastian Haumann, Martin Knoll, Detlev Mares, 2020-03-03 In history, cities and nature are often treated as two separate fields of research. *Concepts of Urban Environmental History* aims to bridge this gap. The contributions to this volume survey major concepts and key issues which have shaped recent debates in the field. They

address unresolved questions and future challenges As a handbook the collection offers a comprehensive overview for researchers and students both from a historical and an interdisciplinary background **Strands of Sustainability** Gerard Magill,James Benedict,2022-11-07 This volume highlights emerging concerns and pivotal problems about our planet s environment and ecology The contributions gathered here highlight the importance of integrating expertise to foster strands of sustainability regarding artificial intelligence education health biomedical engineering and generational challenges The book concludes with an ethical analysis of the multiple and over lapping challenges that require urgent attention and long term resolution It will appeal to scholars and students in a variety of disciplines and fields that deal with sustainability

The Sacred Depths of Nature Ursula Goodenough,2023 This eloquent volume reconciles our contemporary scientific understanding of reality with our timeless spiritual yearnings Addressing ideas like evolution emotions sexuality and death The Sacred Depths of Nature allows even non scientists to appreciate that the origins of life and the universe are no less meaningful in light of our scientific understanding of them This new edition offers a deepened consideration of emergent properties and emergent dynamics as well as an exploration of their role as the generators of life s complexity Goodenough also expands upon the ethic of ecomorality in a new chapter and incorporates new quotes figures and poems in her analysis

The Evolution of Economic Wellbeing Zuhayr Mikdashi,2018-12-19 Throughout history humans have sought to enhance their wellbeing across various domains Though the spectrum of factors responsible for wellbeing has widened considerably and advances have been realized in scientific technological fields significant failures have been encountered in establishing peaceful relations among various communities and the natural environment has been degraded inconsiderately by humans since the Industrial Revolution This book identifies the key factors that influence changes in wellbeing both positively and negatively within a framework of socio economic globalization instantaneous interconnectedness and rising environmental risks These clusters of progress comprise essentially the following seven areas bolstering peace and security respecting universal fundamental values satisfying personal and social basic needs expanding knowledge and managerial technological skills promoting arts and culture husbanding natural resources and protecting the environment and concerting actions for the global common good The term progress is used here to mean an all embracing sustainable advancement towards desirable goals be they material or non material offering higher levels of wellbeing to individuals and to society at large compared to previous or current conditions In unravelling the progress conundrum the author draws on his own original research and field work experiences which dovetail with those of other scholars by complementing their findings and or by offering different appraisals The author adopts an inter disciplinary approach that overcomes the silo like compartmentalization of fields of study The said approach enables us to reach a better understanding of the complex reality of progress or regression in various domains *The Politics of the Environment* Neil Carter,2018-08-09 Environmental problems are firmly on the political agenda The stark threat to the planet from climate change biodiversity loss and pollution

can no longer be ignored by governments political parties businesses or individuals Responding to the considerable developments of the last decade Neil Carter has updated his popular textbook thoroughly while retaining the existing structure of previous editions The Politics of the Environment continues to analyse the relationship between green ideas and other political doctrines the development of green parties and public policymaking and environmental issues at international national and local levels It provides students with a comprehensive comparative introduction to ideas activism and policy New to this edition are discussions on climate justice climate legislation and recent environmental struggles such as demonstrations against fracking It employs a variety of global examples and includes pedagogical features such as boxes a glossary and guides to further study

Castration Desire Robinson Murphy, 2023-12-14 Theorizes an alternative form of masculinity in global literature that is less egocentric and more sustainable both in terms of gendered and environmental power dynamics Contemporary novelists and filmmakers like Kazuo Ishiguro Japanese British Emma Donoghue Irish Canadian Michael Ondaatje Sri Lankan Canadian Bong Joon ho South Korean and J M Coetzee South African Australian are emblematic of a transnational phenomenon that Robinson Murphy calls castration desire That is these artists present privileged characters who nonetheless pursue their own diminishment In promulgating through their characters a less egocentric mode of thinking and acting these artists offer a blueprint for engendering a more other oriented global relationality Murphy proposes that in addition to being an ethical prerogative castration desire s less is more model of relationality would make life livable where veritable suicide is our species otherwise potential fate Castration desire thus offers an antidote to rapacious extractivism with the ambition of instilling a sustainable model for thinking and acting on an imminently eco apocalyptic earth In providing a fresh optic through which to read a diversity of text types Castration Desire helps define where literary criticism is now and where it is headed Castration Desire additionally extends and develops a zeitgeist currently unfolding in critical theory It brings Leo Bersani s concept psychic utopia together with Judith Butler s radical egalitarianism but transports their shared critique of phallic individualization into the environmental humanities In doing so this book builds a new framework for how gender studies intersects with environmental studies

Routledge Handbook of Ecocriticism and Environmental Communication Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2019-02-01 Ecocriticism and environmental communication studies have for many years co existed as parallel disciplines occasionally crossing paths but typically operating in separate academic spheres These fields are now rapidly converging and this handbook aims to reinforce the common concerns and methodologies of the sibling disciplines The Routledge Handbook of Ecocriticism and Environmental Communication charts the history of the relationship between ecocriticism and environmental communication studies while also highlighting key new paradigms in information studies diverse examples of practical applications of environmental communication and textual analysis and the patterns and challenges of environmental communication in non Western societies Contributors to this book include literary film and

religious studies scholars communication studies specialists environmental historians practicing journalists art critics linguists ethnographers sociologists literary theorists and others but all focus their discussions on key issues in textual representations of human nature relationships and on the challenges and possibilities of environmental communication The handbook is designed to map existing trends in both ecocriticism and environmental communication and to predict future directions This handbook will be an essential reference for teachers students and practitioners of environmental literature film journalism communication and rhetoric and well as the broader meta discipline of environmental humanities Climate Consciousness and Environmental Activism in Composition Joseph R. Lease, 2020-02-18 Now more than ever in a time when Americans still do not believe that humans are the primary cause of Earth's climate change crisis the burden on educators to inform challenge and motivate students about sustainability is greater than it ever has been On college campuses writing intensive courses often located within First Year or General Education curricula are an ideal place to take up this charge because of the flexibility of their content and the high volume of students that they reach In this volume a varied group of composition instructors with wide ranges and types of experiences provides best practices for bringing issues surrounding climate change into the writing classroom From literature based composition and creative writing courses to design thinking workshops to seminars against sustainability the authors in this volume lay out a multitude of possibilities for blending writing and environmental concerns that fellow practitioners can easily adopt or modify for their own use
