Hear Where We Are Michael Stocker, 2013-08-20 Throughout history hearing and sound perception have been typically framed in the context of how sound conveys information and how that information influences the listener *Hear Where We Are* inverts this premise and examines how humans and other hearing animals use sound to establish acoustical relationships with their surroundings This simple inversion reveals a panoply of possibilities by which we can re evaluate how hearing animals use produce and perceive sound Nuance in vocalizations become signals of enticement or boundary setting silence becomes a field ripe in auditory possibilities predator prey relationships are infused with acoustic deception and sounds that have been considered territorial cues become the fabric of cooperative acoustical communities This inversion also expands the context of sound perception into a larger perspective that centers on biological adaptation within acoustic habitats Here the rapid synchronized flight patterns of flocking birds and the tight maneuvering of schooling fish becomes an acoustic engagement Likewise when stridulating crickets synchronize their summer evening chirrups it has more to do with the cricket community monitoring their collective boundaries rather than individual crickets establishing personal territory or breeding fitness In *Hear Where*

We Are the author continuously challenges many of the bio acoustic orthodoxies reframing the entire inquiry into sound perception and communication By moving beyond our common assumptions many of the mysteries of acoustical behavior become revealed exposing a fresh and fertile panorama of acoustical experience and adaptation **Food Lit** Melissa Brackney Stoeger,2013-01-08 An essential tool for assisting leisure readers interested in topics surrounding food this unique book contains annotations and read alike for hundreds of nonfiction titles about the joys of comestibles and cooking Food Lit A Reader s Guide to Epicurean Nonfiction provides a much needed resource for librarians assisting adult readers interested in the topic of food a group that is continuing to grow rapidly Containing annotations of hundreds of nonfiction titles about food that are arranged into genre and subject interest categories for easy reference the book addresses a diversity of reading experiences by covering everything from foodie memoirs and histories of food to extreme cuisine and food expos s Author Melissa Stoeger has organized and described hundreds of nonfiction titles centered on the themes of food and eating including life stories history science and investigative nonfiction The work emphasizes titles published in the past decade without overlooking significant benchmark and classic titles It also provides lists of suggested read alike for those titles and includes several helpful appendices of fiction titles featuring food food magazines and food blogs Worm Work Janelle A. Schwartz,2012 Worms Natural history is riddled with them Literature is crawling with them From antiquity to today the ubiquitous and multiform worm provokes an immediate discomfort and unconscious distancing it remains us against them in anthropocentric anxiety So there is always something muddled or dirty or even offensive when talking about worms Rehabilitating the lowly worm into a powerful aesthetic trope Janelle A Schwartz proposes a new framework for understanding such a strangely animate nature Worms she declares are the very matter with which the Romantics rethought the relationship between a material world in constant flux and the human mind working to understand it Worm Work studies the lesser known natural historical records of Abraham Trembley and his contemporaries and the familiar works of Erasmus Darwin Charles Darwin William Blake Mary Shelley and John Keats to expose the worm as an organism that is not only reviled as a taxonomic terror but revered as a sign of great order in nature as well as narrative This book traces a pattern of cultural production a vermiculture that is as transformative of matter as it is of mind It distinguishes decay or division as positive processes in Romantic era writings compounded by generation or renewal and used to represent the biocentric complex structuring of organicism Offering the worm as an archetypal figure through which to recast the evolution of a literary order alongside questions of taxonomy from 1740 to 1820 and on Schwartz unearths Romanticism as a rich humus of natural historical investigation and literary creation *Atmospheric Noise* Marina Peterson,2021-02-05 In *Atmospheric Noise* Marina Peterson traces entanglements of environmental noise atmosphere sense and matter that cohere in and through encounters with airport noise since the 1960s Exploring spaces shaped by noise around Los Angeles International Airport LAX she shows how noise is a way of attuning toward the atmospheric through noise we learn to listen to the sky and
