An Elusive Victorian The Evolution Of Alfred Russel Wallace:

An Elusive Victorian Martin Fichman, 2010-11-15 Codiscoverer of the theory of evolution by natural selection Alfred Russel Wallace should be recognized as one of the titans of Victorian science. Instead, he has long been relegated to a secondary place behind Darwin. Worse, many scholars have overlooked or even mocked his significant contributions to other aspects of Victorian culture. With *An Elusive Victorian*, Martin Fichman provides the first comprehensive analytical study of Wallace's life and controversial intellectual career. Fichman examines not only Wallace's scientific work as an evolutionary theorist and field naturalist but also his philosophical concerns, his involvement with theism, and his commitment to land nationalization and other sociopolitical reforms such as women's rights. As Fichman shows, Wallace worked throughout his life to integrate these humanistic and scientific interests. His goal: the development of an evolutionary cosmology, a unified vision of humanity's place in nature and society that he hoped would ensure the dignity of all individuals. To reveal the many aspects of this compelling figure, Fichman not only reexamines Wallace's published works but also probes the contents of his lesser-known writings, unpublished correspondence, and copious annotations in books from his personal library. Rather than consider Wallace's science as distinct from his sociopolitical commitments, *An Elusive Victorian* assumes a mutually beneficial relationship between the two, one which shaped Wallace into one of the most memorable characters of his time. Fully situating Wallace's wide-ranging work in its historical and cultural context, Fichman's innovative and insightful account will interest historians of science, religion, and Victorian culture as well as biologists.

Understanding Evolution in Darwin's "Origin" Maria Elice Brzezinski Prestes, 2023-10-10 This book aims to encourage the reading of *On the Origin of Species* and to include it in the teaching of evolution. With a comprehensive overview of the development of Darwin's theory, the volume provides relevant aspects of Darwin's life and work in connection with the broader context of his time. The historical and philosophical analysis mirrored in the socio-cultural scope enables the diachronic reading of the text. It is built on various sources of historians and philosophers of science and sheds fresh light on them. Its uniqueness is the broad structure that covers four parts: the pre-Darwinian concepts of species changes, some key elements of Darwin's pursuit of the causes of evolution from his voyage on Beagle to the publication of his groundbreaking work, chapter-by-chapter analysis of the *Origin* and subsequent developments in evolutionary thought. This book is of interest to undergraduate and graduate students, scholars in history, philosophy, and sociology of science, and science education as well as the general public.

Wallace, Darwin, and the Origin of Species James T. Costa, 2014-06-16 Darwin is credited with discovering evolution through natural selection, but Alfred Russel Wallace saw the same process at work in nature and elaborated the same theory. Dispelling misperceptions of Wallace as a secondary figure, James Costa reveals the two naturalists as equals in advancing one of the greatest scientific discoveries of all time.

From Eve to Evolution Kimberly A. Hamlin, 2014-05-08 *From Eve to Evolution* provides the first full length study of American women s responses to evolutionary theory and illuminates the role science played in the nineteenth century women s rights movement Kimberly A Hamlin reveals how a number of nineteenth century women raised on the idea that Eve s sin forever fixed women s subordinate status embraced Darwinian evolution especially sexual selection theory as explained in *The Descent of Man* as an alternative to the creation story in Genesis Hamlin chronicles the lives and writings of the women who combined their enthusiasm for evolutionary science with their commitment to women s rights including Antoinette Brown Blackwell Eliza Burt Gamble Helen Hamilton Gardener Charlotte Perkins Gilman and Elizabeth Cady Stanton These Darwinian feminists believed evolutionary science proved that women were not inferior to men that it was natural for mothers to work outside the home and that women should control reproduction The practical applications of this evolutionary feminism came to fruition Hamlin shows in the early thinking and writing of the American birth control pioneer Margaret Sanger Much scholarship has been dedicated to analyzing what Darwin and other male evolutionists had to say about women but very little has been written regarding what women themselves had to say about evolution *From Eve to Evolution* adds much needed female voices to the vast literature on Darwin in America

Fictions of Certitude John S. Haller, 2020-03-24 The search for belief and meaning among nineteenth century intellectuals The nineteenth century s explosion of scientific theories and new technologies undermined many deep seated beliefs that had long formed the basis of Western society making it impossible for many to retain the unconditional faith of their forebears A myriad of discoveries including Faraday s electromagnetic induction Joule s law of conservation of energy Pasteur s germ theory Darwin s and Wallace s theories of evolution by natural selection and Planck s work on quantum theory shattered conventional understandings of the world that had been dictated by traditional religious teachings and philosophical systems for centuries *Fictions of Certitude* Science Faith and the Search for Meaning 1840 1920 investigates the fin de si cle search for truth and meaning in a world that had been radically transformed John S Haller Jr examines the moral and philosophical journeys of nine European and American intellectuals who sought deeper understanding amid such paradigmatic upheaval Auguste Comte John Henry Newman Herbert Spencer Alfred Russel Wallace Thomas Henry Huxley John Fiske William James Lester Frank Ward and Paul Carus all belonged to an age in which one world was passing while another world that was both astounding and threatening was rising to take its place For Haller what makes the work of these nine thinkers worthy of examination is how they strove in different ways to find certitude and belief in the face of an epochal sea change Some found

ways to reconceptualize a world in which God and nature coexist For others the challenge was to discern meaning in a world in which no higher power or purpose can be found As explained by D H Meyer The later Victorians were perhaps the last generation among English speaking intellectuals able to believe that man was capable of understanding his universe just as they were the first generation collectively to suspect that he never would
