examine how this impacted on their lives and families Other contributors inquire about the economics of music and women and how in different situations some women may have been financially empowered or even in control of their own money making This collection offers a glimpse at women from home stage work and convent from many classes and from culturally diverse countries including France Spain Italy England Austria Russia and Mexico and imagines a musical history centered in the realities of those lives

The Singer-Songwriter in Europe Isabelle Marc, Stuart Green, 2016-03-22 The Singer Songwriter in Europe is the first book to explore and compare the multifaceted discourses and practices of this figure within and across linguistic spaces in Europe and in dialogue with spaces beyond continental borders The concept of the singer songwriter is significant and much debated for a variety of reasons Many such musicians possess large and zealous followings their output often esteemed politically and usually held up as the nearest popular music gets to high art such facets often yielding sizeable economic benefits Yet this figure per se has been the object of scant critical discussion with individual practitioners celebrated for their isolated achievements instead In response to this lack of critical knowledge this volume identifies and interrogates the musical linguistic social and ideological elements that configure the singer songwriter and its various equivalents in Europe such as the French auteur compositeur interprète and the Italian cantautore since the late 1940s Particular attention is paid to the emergence of this figure in the post war period how and why its contours have changed over time and space subsequently cross cultural influences and the transformative agency of this figure as regards party and identity politics in lyrics and music often by means of individual case studies The book's polycentric approach endeavours to redress the hitherto Anglophone bias in scholarship on the singer songwriter in the English speaking world drawing on the knowledge of scholars from across Europe and from a variety of academic disciplines including modern language studies musicology sociology literary studies and history
