

R13.1

An *index* is an integer value which represents a position in an array list. The bounds of an array list is from 0 to 1 less than the size of the array list. A bounds error occurs when either the minimum or maximum index value is exceeded in an attempted access of an array list element. Anything less than 0 or greater than or equal to the array list size will produce a bounds error.

```
import java.util.ArrayList;

```

{
    public static void main(String[] args)

        ArrayList a = new ArrayList();
        a.add("a");
        a.add("b");
        String c = (String)a.get(2);
    }
}
```

When you run this program, you get an array index out of bounds exception.
