Who This Book Is For

This learning path is for those who know the basics of Blender and have hands on experience with the software. We will directly dive into creating characters first. If you wish to use Blender to create games, animated films and architecture simulations, this learning path will benefit you.

What You Will Learn

- Use your sculpting skills to carve the character features from the mesh.
- Find the best possible flow for your edge loops to enhance the character features and to get the best possible range of deformation.
- Mix both the Blender Internal and Cycles rendering engines in order to render materials as quickly as possible.
- Know when and where to use various types of geometry something that saves time in one instance will pose significant problems in another.
- Create a 3D robot toy model from start to finish using the basic modeling tools of Blender.
- Make a full alien character using the skin mesh modifier and the sculpting tools with an artistic approach.
- Use re topology techniques to create a clean 3D version of the previously sculpted alien.
- Model a full haunted house and its environment using more advanced modeling tools and techniques such as the Array Modifier, Instance duplication and Curves.

In Detail

Blender 3D is one of the top 3D animation software available. As the Blender software grows more powerful and popular, there is a demand to take your modeling skills to the next level. This learning path is divided into three modules that will take you on this incredible journey of creating games.

The first module will take you on a journey to understand the workflow normally used to create characters from the modeling to the rendering stages using the tools of the last official release of Blender exclusively. You will be making production quality 3D models and characters quickly and efficiently which will be ready to be added to your very own animated feature or game.

The second module will help you develop a comprehensive skill set that covers the key aspects of mechanical modeling. You will create many types of projects including a pistol, spacecraft, robot and a racer. By the end of this module, you will have mastered a workflow that you will be able to apply to your own creations.

The final module will help you to create many types of projects using a step by step approach. Each project in this module will give you more practice and increase your knowledge of the Blender tools and game engine.

This learning path combines some of the best that Packt has to offer in one complete curated package. It includes content from the following Packt products:

- Blender 3D Cookbook, Second Edition by Enrico Valenza
- Blender 3D Incredible Machines, Second Edition by Christopher Kuhn
- Blender 3D By Example by Romain Caudron and Pierre Armand

Nicq Style and approach

This easy to follow course will teach you how to create complex 3D characters, create incredible machines and put them together to create a 3D scene. Each topic is explained sequentially in the process of creating various models and includes detailed explanations of the basic and advanced features.

Modeling a Motorcycle in Blender, 2016

Learn production techniques for hard surface modeling a realistic motorcycle in Blender. Author Darrin Lile guides you through the process of creating a Harley Davidson Fat Boy with proper scale and proportions. These techniques can be used to replicate any other vehicle or man made machined parts in Blender. Darrin begins by creating the frame of the motorcycle using curves. He then builds up the motorcycle piece by piece creating the exhaust pipes, fenders, handlebars, engine

components and brakes These lessons capitalize on the Path tool and modifiers like Solidify and Booleans Finally Darrin uses Blender s Cycles render engine to create the materials and lighting for the scene and UV maps the textures to key pieces of the bike In the end you will have a greater understanding of Blender s modeling tools and production processes so that you can create vehicles and other hard surface projects of your own
