The NIPS '17 Competition: Building Intelligent Systems Sergio Escalera, Markus Weimer, 2018-09-27 This book summarizes the organized competitions held during the first NIPS competition track. It provides both theory and applications of hot topics in machine learning such as adversarial learning, conversational intelligence, and deep reinforcement learning. Rigorous competition evaluation was based on the quality of data, problem interest, and impact, promoting the design of new models and a proper schedule and management procedure. This book contains the chapters from organizers on competition design and from top-ranked participants on their proposed solutions for the five accepted competitions: The Conversational Intelligence Challenge, Classifying Clinically Actionable Genetic Mutations, Learning to Run Human Computer Question Answering Competition, and Adversarial Attacks and Defenses.

Intelligent Agent Software Engineering, 2003-01-01 From theoretical and practical viewpoints, the application of intelligent software agents is a topic of major interest. There has been a growing interest not only in new methodologies for development of intelligent software agents but also the way in which these methodologies can be supported by theories and practice. Intelligent Agent Software Engineering focuses on addressing the theories and practices associated with implementing intelligent software agents.
