Self-Publishing and Collection Development Robert P. Holley, 2015-09-15 The current publishing environment has experienced a drastic change in the way content is created delivered and acquired particularly for libraries With the increasing importance of digital publishing more than half the titles published in the United States are self published With this growth in self published materials librarians publishers and vendors have been forced to rethink channels of production distribution and access as it applies to the new content Self Publishing and Collection Development Opportunities and Challenges for Libraries will address multiple aspects of how public and academic libraries can deal with the increase in self published titles While both academic and public libraries have started to grapple with the burgeoning issues associated with self published books many difficulties remain To develop effective policies and procedures stakeholders must now tackle questions associated with the transformation of the publishing landscape Obstacles to self publishing include the lack of reviews the absence of cataloging and bibliographic control proprietary formats for e books and the difficulty for vendors in providing these works General chapters will include information on reviewing sources cataloging and bibliographic control and vendor issues Information addressing public libraries issues will highlight initiatives to make self published materials available at the Los Gatos Public Library in California and the Kent District Library in Michigan Chapters on academic library issues will address why self published materials are important for academic institutions especially those with comprehensive collecting interests Several self published authors focus on how they attempt to make their works more suitable for public libraries Finally the book concludes with a bibliographic essay on self publishing As the term traditional publishing begins to fade and new content producers join the conversation librarians publishers and vendors will play an important role in facilitating and managing the shift
