Building Effective Evaluation Capacity Richard Boyle, 2017 Provided by publisher *Building Effective Evaluation Capacity* Richard Boyle, Donald Lemaire, In the 1960s policy and program evaluation was used to improve government programs and enhance monitoring In the 1970s and 1980s evaluation was redefined as a tool of accountability via the budgetary process to assess government performance against standards and objectives *Building Effective Evaluation Capacity* draws upon three decades of experience and observation to derive prescriptive lessons A wealth of illustrative case studies of good practice highlight the book Rather than proposing a single model for evaluation capacity development this comparative approach allows readers to apply the findings to their own circumstances *Building Effective Evaluation Capacity* will be of interest to public policy specialists economists and students of government and comparative politics *Building Effective Evaluation Capacity* Richard Boyle, Donald Lemaire, 1999-01 In the 1960s policy and program evaluation was used to improve government programs and enhance monitoring In the 1970s and 1980s evaluation was redefined as a tool of accountability via the budgetary process to assess government performance against standards and objectives *Building Effective Evaluation Capacity* draws upon three decades of experience and observation to derive prescriptive lessons A wealth of illustrative case studies of good practice highlight the book Rather than proposing a single model for evaluation capacity development this comparative approach allows readers to apply the findings to their own circumstances *Building Effective Evaluation Capacity* will be of interest to public policy specialists economists and students of government and comparative politics *Quality Matters* Robert Schwartz, John Mayne, 2005-01-01 Contributors are from Australia Canada the European Union France the Netherlands New Zealand Sweden Switzerland United Kingdom United States and the World Bank They examine and analyze practices for assuring the quality of evaluation performance auditing and performance reporting in the face of political organizational and technical obstacles A final chapter addresses the extent to which quality assurance systems become bothersome rituals or remain meaningful mechanisms to ensure quality control This well defined volume will be of particular interest to policymakers and adds much to the literature on program evaluation and performance auditing **Mind the Gap** Phillip Allman, Jos Vaessen, 2017-07-28 Over the past twenty to thirty years evaluation has become increasingly important to the field of public policy The number of people involved and specializing in evaluation has also increased markedly Evidence of this trend can be found in the International Atlas of Evaluation the establishment of new journals and evaluation societies and the increase in systems of evaluation Increasingly the main reference point has become an assessment of the merit and value of interventions as such rather than the evaluator's disciplinary background This growing importance of evaluation as an activity has also led to an increasing demand for the type of competencies evaluators should have Evaluation began as a niche area within the social and behavioral sciences It subsequently became linked to policy research and analysis and has more recently become trans disciplinary This volume demonstrates an association

between the evaluation tradition in a particular country or policy field and the nature of the relationship between social and behavioral science research and evaluative practice This book seeks to offer comprehensive data which lead to conclusions about patterns that transcend the gap between evaluation and the social scientific disciplines Mind the Gap has a twofold aim The first is to highlight and characterize the gap between evaluation practices and debates and the substantive knowledge debates within the social and behavioral sciences The second is to show why this gap is problematic for the practice of evaluation while at the same time illustrating possible ways to build bridges The book is centered on the value of producing useful evaluations grounded in social science theory and research
